

CHAPTER FIVE

ROADWAY STANDARDS, SPECIAL PROVISIONS AND CONTRACTS

PURPOSE AND LOCATION OF ROADWAY STANDARDS 5-1

A list of the roadway standards that are applicable to each project is to be listed in the plans. Usually, these standards are listed on Sheet 1-A of the plans. An up-to-date list of the standards is available on Project Services WebPages.

For additional information related to roadway standards, refer to the current Roadway Standard Drawings Manual.

NOTE: For up-to-date listing of Roadway Standard Drawings, Please, see our WebPages at

http://www.ncdot.org/doh/preconstruct/ps/std_draw/.

PROPOSAL LINE UP 5-1A

A list of information that is required for inclusion into bidding proposals is available on our WebPages at:

<http://www.ncdot.org/doh/preconstruct/ps/contracts/expedi/default1.html>.

It is the responsibility of the Project Engineer to prepare a checklist for the applicable project special provisions and standard special provisions for each project. It shall be the responsibility of the State Contract Officer to review the checklist prior to the final assembly of the proposal form.

The following lists are available:

- (1) Proposal line up
- (2) General construction projects
- (3) Resurfacing projects

PLANT PEST QUARANTINES 5-2

The Roadway Design Unit is responsible for assisting the Division Engineer in maintaining compliance with the federal and state plant pest quarantines. A list of counties with plant pest quarantines is provided in this guideline (5-2A).

It is the responsibility of the Project Engineer to determine if a project is in a quarantine area. This shall always be discussed on the field inspection. When a project is in a quarantine area, a special provision will be required in the contract.

RARE AND ENDANGERED PLANT SPECIES

5-3

The Project Development and Environmental Analysis Branch is responsible for conducting research to determine the probability of rare and endangered plant species which may be encountered on proposed highway projects. However, when research and on-site investigations are being conducted by the Project Engineer and it is determined that sensitive plants are being disturbed, it shall be discussed with the Roadside Environmental Unit.

When a plant species is being disturbed, a special provision will be required in the contract. See the Contracts Section in the Project Services Unit.
