

Autonomous Mobility

About May Mobility

We help communities of all kinds solve their toughest transportation challenges with first- and last-mile on demand and circulator services. Our autonomous vehicles offer a path to integrated operations that fill transit gaps, grow ridership and increase revenue.

Benefits of May Mobility Autonomous Vehicles

Flexible Service Delivery

Turn-key, in-house, or third-party operations: whichever is right for you, we provide FMVSS-compliant vehicles operating on public roads with support, maintenance and community engagement to integrate into your larger transit network.

Accessible and Equitable

Our accessible vehicles are fitted with ADA-compliant wheelchair ramps. Additionally, we work with seniors and individuals with disabilities to ensure their needs are met and their voices are heard.

Working in Partnership

Transportation touches everyone. We're happy to work with your partners, various departments, and users to ensure your AV services are well connected, meet your needs and have growing usage.

Extensive Safety Throughout

Our vehicles' safety features include a robust fallback safety system, active monitoring, vehicle guidance (tele-assist), a suite of redundant systems and more.

Addressing Your Unique Challenges

- Providing efficient and convenient transportation options for riders to nearby points of interest, including last-mile connectivity to public transportation hubs
- Enhancing accessibility for riders with mobility limitations and supporting disadvantaged communities
- Reducing traffic congestion and parking shortages with shared autonomous service
- Giving your workforce and community a competitive advantage by adopting innovative transportation
- Helping you meet your environmental and sustainability goals

How May Mobility Works

May Mobility collaborates with organizations and communities to address the transportation gaps you're facing with an autonomous vehicle solution. Together, we are able to transform your transportation by designing efficient, innovative and accessible solutions to tackle your challenges. We welcome the opportunity to explore how an autonomous vehicle from May Mobility can work for you.
