

### Eligible Activities - Roadside Feature:

The following is a list of eligible interstate roadside preservation activities. Only activities listed below may be performed under this program unless prior written authorization is obtained from the State Road Maintenance Engineer and the FHWA Transportation Engineer who will consult with the FHWA Division Asset Management Program Manager.

#### Drainage

1. Replace/Repair paved lateral ditches – including leveling, sealing, or removing and replacing with rip-rap paved ditches along a corridor
2. Line/Repair Crossline pipes – including repair or lining of crossline pipes that are damaged, rusted, or no longer functioning as intended
3. Inlet Repair/Retrofit – including repair of drainage inlets along a corridor, or the retrofit of open throat boxes to grated inlets
4. Shoulder Drains – including systematic approach of locating, inspecting and the repairing of shoulder drains along a corridor.

#### Traffic

5. Pavement Markings – including pavement striping on a systematic cyclical schedule
6. Pavement Markers – including placement of pavement markers or the repair of lenses in snow plowable markers
7. Signs – including the systematic cleaning/washing of signs and sign replacement to meet current design standards.
8. Guardrail – including upgrading or replacement
9. Lighting – including upgrading a network of roadway lighting along a corridor
10. Attenuators – including upgrading or replacement

## **Section A. General Requirements**

1. Individual Projects – Stand-Alone projects on Eligible Activities

Projects include work performed on eligible drainage and traffic assets that are part of a roadway corridor and/or preventive maintenance activities that are performed on a systematic cyclical schedule.

2. Inclusive Projects – Work performed in conjunction with Bridge Preservation or Pavement Preservation Projects

Projects include work performed on eligible drainage and traffic activities that are included within the project limits of a bridge preservation, or pavement preservation project.

## **Section B. Eligibility Requirements**

1. Condition of drainage or traffic asset must be below the Performance Measure Target for the most recent Maintenance Condition Assessment.
2. Division can perform individual assessment on proposed project corridor utilizing MCAP assessment criteria. Assets within corridor must be below the Performance Measure Target.
3. Assets within the corridor do not meet current design standards in accordance with the MUTCD. (i.e. Guardrail, Signs, Impact Attenuators)
