The Honorable Elaine L. Chao, Secretary
United States Department of Transportation
1200 New Jersey Avenue, S.E.
Washington, DC 20590

Dear Secretary Chao:

Please accept this letter of support for the North Carolina Department of Transportation's (NCDOT's) application *Continuing Corridor K: Connecting People, Goods, and Services* to the U.S. Department of Transportation's BUILD Program. This project is the outcome of extensive coordination between government agencies, local officials, and environmental stakeholders to ensure a project that meets the local and broader needs for reliability and connectivity, while maintaining environmental sensitivity.

Graham County, where the project is located, relies on a few main roads for transportation into and out of the county. These roads are susceptible to mountainous conditions, often rendering them unusable due to wintery weather, landslides, and heavy rain. This project will improve road reliability by increasing the resiliency of existing facilities.

Corridor K is critical to long-distance travel in western North Carolina to surrounding counties and is vital for local trips within Graham County as well. The project will improve connectivity for local and commercial traffic that moves through the area. Increased connectivity is crucial for residents who must travel out of the county for jobs, healthcare, and other critical services, as well as for commercial traffic which must use these roads to transport goods in and out of North Carolina. These improvements will bring about economic benefits for a rural county with a declining workforce.

Without this project, local and commercial traffic will continue to face uncertainty as the current road network proves to be unreliable. These improvements will increase the reliability and connectivity of the existing road network, while providing safety and economic benefits, as well the support needed for an improved quality of life.
