

NCDOT CADD Manual Revision Log

The following general revisions have been made throughout the NCDOT CADD Manual:

Section	Summary of Revision(s)
Cover, title page, and footer	Updated the revision date and footer format for the September 2026 release.
General	Revised references to the Technical Services Unit to Preconstruction Division
General	Revised links to sections that were renumbered.

The following sections of the NCDOT CADD Manual have been revised to add, clarify, or reorganize guidance:

Section	Summary of Revision(s)
1.6	Clarified responsibilities for the CADD Support Services Team, and CADD Innovation Team.
2.2	Combined SharePoint and ATLAS into the same section.
2.3-2.4	Renumbered the ProjectWise and Bentley OpenX and Other Software Sections.
2.4	Expanded the Open Bridge description and added sections for additional Bentley Software and Third Party Software.
2.5	Added a dedicated Bentley Infrastructure Cloud section.
3.2	Removed the Database Resources section and renumbered following sections.
3.4	Revised folder structure and file naming requirements to point to the new PW Folder Structure and CADD File Naming spreadsheet and added governance for standard and custom project folders.

Section	Summary of Revision(s)
3.7	Added a new section for Item Types

Note: This summary is provided as a quick reference. Users should consult the applicable manual section and linked resources for complete requirements and current guidance.
