ATLAS 2021 Quarter 1 Release Notes

April 9th, 2021

General training and release overview trainings are available. Dates and times can be found [here](#).

1. **External Agency Document Access**

ATLAS users are now able to share documents with other external agencies automatically on document upload to the ATLAS Workbench via the External Collaboration folder on Connect NCDOT.

2. **Project Commitments Linking**

ATLAS users are now able to navigate from the ATLAS Preconstruction Workbench to the project-specific project commitments tool on Connect NCDOT Preconstruction. On ATLAS Preconstruction Workbench's Basic Project Info tab, the number of project commitments by commitment status is now displayed.

3. **Address Connect NCDOT Preconstruction Project Locking**

The ATLAS Workbench now displays information on Project Locking. Users are notified on whether or a not a project is locked prior to Letting and are blocked from uploading documentation to the corresponding project in Connect NCDOT.

4. **Preconstruction to Scoping Workbench Navigation**

If a Preconstruction project has been connected to a Scoping project, the ATLAS Preconstruction Workbench now displays a navigable link to the related Scoping NCDOT Connect page. The link opens a new browser tab for this page.

5. **Enhance Layer Search in Screening Tool**

The Layer Search functionality in the ATLAS Screening tool now searches by a layer's Name, Alias, and Description, similar to the same functionality in the ATLAS Search tool.

6. **Workbench Search**

Users can now search the ATLAS Workbench for the location of specific documents in the Workbench by document name. Searching for a document will return the results by Discipline, Section, and Name.

7. **DOT ATLAS Screening Templates**

ATLAS Screening tool users now have DOT-curated templates that they can use, along with using their own or starting a new screening. ATLAS Admin users can now create these templates for other ATLAS users to use for their business workflow-specific GIS layer screenings.

8. **DOT ATLAS Search Templates**

Search tool users now have DOT-curated layer templates that they can use, along with using their own saved template as well as starting a new one. ATLAS Admin users can now create these templates for other ATLAS users to use for their business specific GIS workflows.

9. **Add screening layer indicator in Search UI**

On the Search for Layers screen in the Search tool, when the user expands the list of layers to display and select layers, there is now indicator in the layer list that a layer is available for screening. This is indicated by an asterisk next to the layer name.

10. **Update Search Tool Header to include Screening Tool link**

In the header bar for the Search Tool, there is now a link to jump to the ATLAS Screening Tool in a new browser tab.

11. **Update Screening Tool Header to include Search Tool link**

In the header bar for the Screening Tool, there is now a link to jump to the ATLAS Search Tool in a new browser tab.

12. **Update Workbench Tool Header to include Screening & Search Tool links**

In the header bar for the Workbench Tool, there is now a link to jump to the ATLAS Screening Tool in a new browser tab. The existing Search tool link icon has been modified to match the new Screening tool link.

13. **Increase Map Real Estate on Search Tool**

The Table on of Contents/ Menu on the side is now collapsible. Hover-over text for collapse button is "Show/Hide Table of Contents".
