SUBJECT: Project: Transfer of Tick Creek Mitigation Site to EEP

**Project Description:** The Tick Creek mitigation site is a 6744 foot stream mitigation site in Chatham county and was constructed to offset impacts associated with TIP U-2524AB and AC. Per the as-built plan, the site contains 3011 feet of stream restoration credit and 3733 feet of stream preservation credit. Construction of the site was completed in September 2005 and tree planting was completed in February 2006. All of the photo points have been set per the mitigation plan and permit. There are three combination locked gates located at the site entrance. The combination for the gates is 1255. A CD with electronic files for this project and the as-built plans are also being transmitted with this letter. Hard copies of all permits and a copy of the approved mitigation plan for this project were submitted to EEP on 12/01/2005.

**Location:** Chatham County southeast of Siler City on Jim Moody Road (SR 2172)

**River Basin:** The site is located in the Cape Fear River Basin.
