Phil,
This project was investigated for on-site stream mitigation a couple years ago. There was a potential stream restoration site, but in the end the property owner was not interested in the offer for the conservation easement. It appears that \$25K was established in the WM break by Leilani's group for R/W to start early negotiations with the property owner on the conservation easement. In the end, it appears that the EEP payment came from the WM break.

That being said my group has no other need for the WBS to remain open from our perspective. Let me know if you need additional information on this project.

Hello,

Can either of you please provide me with a status update on this inactive project. It has been inactive for over 3 years.

Thanks

CC: LeiLani Paugh <lpaugh@dot.state.nc.us> ,
Randy Griffin <rgriffin@dot.state.nc.us>

Byron,

The property owner (Scott Hughes) was not satisfied with the land
comps. from R/W for the proposed mitigation site on the Fork of
Cathey's Creek so I purpose that we abandon the site.

Zach
