Hello Sarah,

I inherited this data from my predecessor and don't know the origin of the shapefile, but I do know that DOT conducted a survey of the Conservation Easement, so I suspect the data originated from your side.

Hi Ryan,

I was wondering if you had some source information for the file you sent over. I don't see any metadata and I was wondering if it came from a survey, parcel data, etc. We're adding it to our database and want to keep track of sources.

Thanks for any information!

There are the shapefiles of the boundary for the Calloway Tract. The other RCW mitigation bank. Again I will get the other info you requested soon.

Hi Rachelle,

Good to hear from you. Things are good here in the Sandhills. I hope you've been doing well! It was a good breeding season at Calloway, and I apologize for neglecting to offer to get you out there. I would love to take a field trip and show you the management and restoration work we've been doing out there. I think we burned over 1,000 acres there this year, and believe we may have cut our last loblolly pine – for a long time - off the property earlier this year!

Let's aim for early October, maybe on a Friday. I'm free on the 12<sup>th</sup> and 19<sup>th</sup>. Let me know if those dates might work. Kerry: are you free on those days?

The Calloway DOT Conservation Easement shapefile is attached.

Best,  
Ryan

Ryan,

Hello! It's been a while. How are you? How were things at Calloway this breeding season? Maybe we could chat one day but I just wanted to ask you if you have shapefiles of the boundary of the Calloway Tract. Someone in our unit is putting our mitigation banks on GIS database. Would love to get down there for a visit sometime if you guys have time to show me around. Maybe this late fall. October ish?

Rachelle
