

PROJECT COMMITMENTS

T.I.P Project No. B-2988
Replacement of Bridge 13 over East Fork Pigeon River
on SR 1890 (Hungry Creek Road)
Haywood County
Federal Aid Project No. BRZ-1890(1)
WBS Element 29424.1.1

COMMITMENTS FROM PROJECT DEVELOPMENT AND DESIGN

Project Development and Environmental Analysis

Approval under Section 26a of the Tennessee Valley Authority (TVA) Act will be required. A copy of the approved CE will be provided to the TVA.

A copy of the CE was mailed to TVA and NCDOT received TVA approval in March 2008.

A jurisdictional determination for the East Fork of the Pigeon River will be required prior to permitting.

An approved jurisdictional determination was received with the 404 permit dated January 8, 2010.

Division Construction/Project Services Unit

There will be an in-stream and 25-foot buffer work moratorium from October 15 to April 15.

The “Guidelines for Construction of Highway Improvements Adjacent to a Crossing Trout Waters in North Carolina” (October 27, 1992) will be adhered to throughout design and construction of the project.

NCDOT will implement Sedimentation and Erosion Control Guidelines for Sensitive Watersheds (15A NCAC 4B 0024) prior to any ground disturbing activities as requested by DWQ in a memorandum dated June 3, 2002.

~~The existing structure (pony truss) will be dismantled and stored at an NCDOT facility. The bridge will be made available for use by Haywood County.~~

The existing bridge is not an eligible truss bridge and will not be stored at an NCDOT facility.

Hydraulics Unit

The Hydraulics Unit will coordinate with the NC Floodplain Mapping Program (FMP) to determine status of project with regard to applicability of NCDOT’s Memorandum of Agreement or approval of a Conditional Letter of Map Revisions (CLOMR) and subsequent final Letter of Map Revisions (LOMR).

Division 14 Construction/Natural Environment Unit

This project involves construction activities on or adjacent to FEMA-regulated streams. Therefore, the Division shall submit sealed as-built construction plans to the Hydraulics Unit upon completion of project construction, certifying that drainage structures and roadway embankment that are located within the 100-year floodplain were built as shown in the construction plans, both horizontally and vertically.

COMMITMENTS FROM PERMITTING

Division 14 Construction/Natural Environment Unit/Roadside Environmental Unit

Construction in the stream is prohibited during the trout spawning period of October 15 to April 15.

All conditions of the attached December 18, 2009 North Carolina Wildlife Resources Commission Letter are included as commitments for this project including Condition 2 which states: "Sediment and erosion control measures shall adhere to the Design Standards for Sensitive Watersheds and be strictly maintained until project completion".
