State Location & Surveys Engineer

Subject: Notification to NC Geodetic Surveys
Destruction of Geodetic Control Monumentation

NC Geodetic Surveys (NCGS) has not been consistently notified of the pending destruction of geodetic control monumentation due to highway construction. This has become a greater concern with the establishment of the HARN. To alleviate this problem, it has been decided that at the time of right of way staking, the Locating Engineer or PEF responsible for staking the right of way should notify the Director of North Carolina Geodetic Surveys. I have provided a copy of the standard form used by NCGS at this time. This form can be faxed or mailed. This form will soon be online at the NCGS web site, www.ncgs.state.nc.us. At such time as it is available, the email notification can be used. Please include in the notes that the monument is inside construction limits and the anticipated let date of the project.

Thank you for your assistance in this matter. If you have questions or comments, please do not hesitate to contact me at 919-250-4109.
