Memorandum To: Location & Surveys' Private Engineering Firms

From: J. Dale Burton, PE, PLS
Location & Surveys Private Engineering Firm Coordinator

Subject: Release of NC Map (version 4.0)

I am pleased to inform you that NC Map version 4.0 is now available to use on NCDOT TIP projects. This version has taken advantage of several of the features that is available in Microstation SE. The most notable and significant change is the availability of line styles. This will eliminate the need to pattern lines in the CADD file. Also, Microstation Workspace variables has been utilized with this release.

Please download the following directories and files from the L&S Server/Support/software/workspaces/:

/NCDOT_ms_config
/NCDOT_ms_stds
/NCDOT_ms_stds_location

These directories will need to be loaded onto the C: drive of your computer. Also, please download the appropriate instruction file (NT.doc or Win95.doc) located on the server in the Support/software/workspaces directory for the operating system you are using. The instruction files are MS_Word 95 documents.

From this point forward, all new projects will be required to utilize version 4.0 of NC Map. If you are currently in progress with a project utilizing NC Map version 3.3, please finish that project with that version and begin all new assignments utilizing NC Map 4.0.

Please feel free to call me or Joel Gullede at (919)250-4112 if you have any questions or problems with this update.
