- The tests performed on the material in the Materials & Test lab are the Penetration, Softening Point and Flow tests (optional).
- Samples taken by the manufacturer or supplier are for Information Purposes. Only project or job samples taken by an approved Inspector are considered official samples as to the Verification of the material.

Type 3 Manufacturer's Certification:* A manufacturer's certification shall be certified statements that the material actually shipped to the project was manufactured by production processes which are periodically and routinely inspected to assure conformance to specification requirements.

Revision 9, Changed Deery American to CrafcO name due to buyout.

Revision 10, Adding missing CrafcO plants, JM7, JM8, JM9; Removed OT50 per CrafcO rep; Removed OT52 Crackfiller Mfg (Replaced by JM5); Removed OT454 (Same as JM2);

Revision 11, Added missing products to JM9 per CrafcO rep. email.

Revision 12, Changed tests performed by M&T lab to make flow test optional.
