

Tier 3: Tests Relate to Soil-Structure Design

In addition to Tier1 test methods, the test methods required for approval in Tier 3 are the followings:

AASHTO

TEST METHOD DESCRIPTION

T216	One-Dimensional Consolidation Properties of Soils
T296	Unconsolidated, Undrained Compressive Strength of Cohesive Soils in Triaxial Compression
T297	Consolidated, Undrained Triaxial Compression Test on Cohesive Soils

Optional Test: T-208 Unconfined Compressive Strength of Cohesive Soil

T-215 Permeability of Granular Soils (Constant Head)
