MEMORANDUM TO: Section Concrete Technicians

FROM: Randy K. Pace *Randy K Pace*  
State Materials Operations Engineer

SUBJECT: Certification Requirements for Concrete Technicians

Questions have arisen concerning the certification requirements for concrete technicians. The purpose of this letter is to reiterate the requirements and expectations of obtaining these certifications.

All concrete technicians must obtain and hold current all concrete certifications listed below. These certifications are valid for four to five years.

Certification Description	Certification Prerequisite
Concrete Field Technician	None
Concrete Batch Technician	Concrete Field Technician
Portland Cement Concrete Pavement Technician	Concrete Field Technician
Concrete Mix Design Technician	Concrete Field Technician Concrete Batch Technician

These certification requirements are in agreement with the Transportation Technician Skill Base Pay abilities and the Position Description Form (PD-102R-92) for a Transportation Technician IV Section Concrete Technician as it relates to the responsibilities of the individuals performing this job.

Each technician has until the end of March 2007 to obtain these certifications. On April 1, 2007 any technician who does not have these certifications will receive a "Below Good" evaluation on their PM and will have the skill removed from their Skill Block.

If you have any questions in this matter, please contact Sam Frederick at 919-733-7091.
