Subject: Letter of Support – North Carolina Department of Transportation FY2024–FY2026 USDOT PROTECT
Application- North Carolina Sustainable Solutions for Transforming flooding prediction to build **Resilient** infrastructure
and **Optimized** operations through **Next-generation** tools and **Groundbreaking** innovation, or **NC STRONG**

Dear Secretary Duffy:

As the North Carolina House Representative for District 7, I am pleased to support the North Carolina Department of Transportation's (NCDOT) application for the U.S. Department of Transportation's (USDOT) Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program. Funding will improve and expand nationally recognized transportation-focused flood-resilience and -response tools that together allow for NCDOT, federal, state, local agencies, and the traveling public to more proactively prepare for, respond to, and recover from statewide flood threats.

These systems are essential for providing public safety and economic continuity during flood events. Together, they help determine and anticipate flood and storm surge impacts and identify critical assets at risk. By connecting hazard information before, during, and after hazardous events, the framework informs emergency routing, inspection priorities, critical-corridor identification, and coordination among state and local agencies, emergency responders, businesses, and communities. Through this grant, NCDOT's suite of flood warning tools will strengthen North Carolina's ability to anticipate disruptions, reduce community isolation, maintain access to critical services and economic centers, prioritize resilient investments, and accelerate post-disaster recovery.

I fully support this application and respectfully encourage the Federal Highway Administration to approve this funding that will support my district and the entire state.

Sincerely,

Matthew Winslow
