

The NCDOT Photogrammetry Unit contracts for two professional services that require private firms to become prequalified:

- **Photogrammetric Services (00157)**
- **Aerial Imagery Services (00002)**

In addition to the information that is required by the department, the NCDOT Photogrammetry Unit will also require the following:

**For 00157 Photogrammetric Services**

1) A list of the hardware and software in use at your NC office (if not one, then the closet office that you propose that would do the work)

2) Samples of work, to include:

- Planimetric mapping file in MicroStation V8 DGN format
- Digital Terrain Model (DTM) in MicroStation V8 DGN format
- Orthophoto in TIF and SID formats with associated world files

**For 00002 Aerial Imagery Services**

1) A list of the hardware (planes, cameras, GPS/IMU equipment, etc.) and software (flight planning, post processing, etc.) in use.

2) Your base of operation.

3) List of sub-consultants you propose using, including the information required in #'s 1 & 2 above

If you have questions or concerns about becoming prequalified to perform Photogrammetric Services or Aerial Imagery Services, please contact Rob Allen at 919 707-7094.
