NOTES

At all fixed points of support, nuts for anchor bolts are to be tightened finger tight and then backed off one and one-half turn. The threads of the anchor bolts shall be burried with a sharp pointed tool.

The 51mm pipe sleeve shall be cut from schedule 40 PVC plastic pipe. The PVC plastic pipe shall meet the requirements of ASTM D1785.

The payment for the pipe sleeves shall be included in the several pay items.

For painted structural steel, bolts, nuts and washers shall be galvanized in accordance with the standard specifications.

For AASHTO M270 grade 345W structural steel, the sole plate shall be AASHTO M270 grade 345W and shall not be galvanized. Anchor bolts and nuts shall be galvanized in accordance with the standard specifications.

Anchor bolts shall meet the requirements of ASTM A449. Nuts shall meet the requirements of AASHTO M291M-12 or AASHTO M292M-2H. Washers shall meet the requirements of AASHTO M293M.

Shop drawings are not required for anchor bolts, nuts and washers. Shop inspection is required.

When field welding the sole plate to the girder flange, use temperature indicating wax pens, or other suitable means, to ensure that the temperature of the sole plate does not exceed 149°C. Temperatures above this may damage the elastomer.

All surfaces of bearing plates shall be smooth and straight.
