GOVERNOR

P.O. BOX 25201, RALEIGH, N.C. 27611-5201

E. NORRIS TOLSON
SECRETARY

MEMORANDUM TO: Project Engineers
Project Design Engineers
FROM: W. J. Rogers, P.E.
State Bridge Design Engineer
DATE: February 4, 1998
SUBJECT: DRILLED PIER CONCRETE

Effective with the October 16, 1998 Letting, Class AA concrete is not being specified for use in drilled piers. The concrete for drilled is referred to as drilled pier concrete.

As such the following note revisions shall be made to eliminate conflict with the drilled pier PSP.

- For structures in highly corrosive areas: "Class AA concrete shall be used in all cast-in-place columns, bent caps, pile caps, and footings."
- Delete the following note: "The Contractor may use Class AA concrete in lieu of Class A concrete in the column"
