# A MESSAGE FROM THE COMMISSIONER OF THE NORTH CAROLINA DIVISION OF MOTOR VEHICLES

The North Carolina Division of Motor Vehicles is pleased to present its "Crash Facts 2005".

Comparing the statistics of 2004 with 2005, there was a 1.7% decrease in the number of fatalities, and a 3.6% decrease in the number of traffic crashes reported. A crash occurred every 2.4 minutes and a person was killed every 5.7 hours on our state highways. There were 1,548 lives lost in 1,418 fatal crashes.

Unfortunately, the leading cause in most of these fatal crashes was "speeding". Failure to yield the right of way and inattention are cited as the two most common contributing circumstances.

The North Carolina Division of Motor Vehicles is constantly striving to make traveling on our highways safer. The actions we take to accomplish this goal include testing and licensing of drivers, having a pro-active medical review process, conducting defensive driving courses, training school bus drivers, and promoting highway safety through excellent customer service. We also enforce the motor vehicle laws, maintain the integrity of official DMV records and share the statistics provided by this publication to all the citizens, law enforcement agencies, traffic engineers and law makers in order to pass laws to make our highways safer. As you read above, our combined efforts paid off in 2005 with decreases in crashes and fatalities.

I challenge you as drivers and citizens of this state to be constantly alert and aware of how our actions and attitudes can contribute to crashes, injuries or deaths. Educate yourself on the tragic consequences of motor vehicle crashes, and then help educate others. As you read the statistics in this book, remember behind each statistic there is a story of tragedy, loss and suffering.

Sincerely,

William C. "Bill" Gore, Jr.  
Commissioner

- O – No Injury.
- C – Complaint of pain without visible signs of injury or momentary unconsciousness.
- B – Other visible injuries such as bruises, swelling, limping or any painful movement.
- A – Bleeding members, distorted member or any condition that required victim to be carried from the scene.
- K – Killed.

Based on reportable crashes only, and includes vehicle types passenger car, pickup, light truck, sport utility, and van. Cases where extent of injury or belt usage is unknown or unable to be determined are excluded. "Belt" includes these categories: lap belt, lap and shoulder belt, shoulder belt, and child restraint. Information includes data for the period January 1 through December 31, 2004.

Note: Belt use is the use reported by the investigating officer. There is evidence that this reported belt use rate exceeds the actual use rate. During 2000, the observed driver belt use in North Carolina averaged 83 percent as a result of the "Click It or Ticket" campaign.
