MESSAGE FROM THE COMMISSIONER OF THE NORTH CAROLINA DIVISION OF MOTOR VEHICLES

An automobile crash is any event that results in injury or property damage attributable directly to the motion of a motor vehicle or its load. The State of North Carolina is dedicated to reducing traffic crashes, fatalities, injuries and property damage by addressing the factors that cause them.

This book's purpose is to serve as a resource for traffic safety experts, public officials and those interested in making North Carolina's roadways, sidewalks and pedal-cyclist paths safe for all of us who travel on them. It presents detailed factors on traffic crashes reported to us in 2006. To provide a better perspective on the state's statistical crash history, it also includes traffic crash, vehicle registration and mileage traveled statistics from 1958–2006.

North Carolina has more state maintained road surfaces (79,042 miles) than any other state except Texas. Seven interstate highways pass through North Carolina, which ranks us ninth in the nation for the number of interstates. Serving the State are 1,813 State Highway Patrol Officers and more than 12,000 local law enforcement officers. These Officers are responsible for investigating each crash reported to them and forwarding the valuable information to the Division. In turn, we input the information into our database and it is extracted by numerous agencies for analysis.

In 2006, 220,224 crashes occurred including 1,555 fatalities and 119,955 nonfatal injuries. Although the number of crashes and nonfatal injuries decreased compared to 2005 statistics, the number of fatalities increased. These facts are very troubling. The Division, along with the Governor's Highway Safety Program, DOT Traffic Engineers and other entities, are striving to improve the statistics through education and highway design. You can help as well by following the laws relating to highway safety and drive safely.

- O -- No Injury
- C -- Complaint of pain without visible signs of injury or momentary unconsciousness
- B -- Other visible injuries such as bruises, swelling, limping or any painful movement
- A -- Bleeding members, distorted member or any condition that required victim to be carried from the scene
- K -- Killed

Based on reportable crashes only, and includes vehicle types passenger car, pickup, light truck, sport utility, and van. Cases where extent of injury or belt usage is unknown or unable to be determined are excluded. "Belt" includes these categories: lap belt, lap and shoulder belt, shoulder belt, and child restraint. Information includes data for the period January 1 through December 31, 2006.

Note: Belt Use is the use reported by the investigating officer. There is evidence that this reported belt use rate exceeds the actual use rate. During 2000, the observed belt use in North Carolina averaged 83 % a result of the "Click It or Ticket" campaign.
