

Section 2D.11 Design of Route Signs

Standard:

A three-digit N.C. Route sign shall be at least 36" x 36" (900 mm x 900 mm) in size on ground mounted and overhead guide signs.

Option:

A 36" x 36" (900 mm x 900 mm) three-digit N.C. Route sign may be used on f-assemblies.

Standard:

The M1-30 and M1-31 signs shall be used to identify secondary roads on the State Highway System. The M1-30 sign shall be used only to identify the most important secondary roads (those roads having road numbers from 1000 to 1099). All other secondary roads, carrying numbers of 1100 or higher, shall be marked with the M1-31 signs, which are individual number and arrow panels grouped together to form the secondary road number. Each M1-30 and M1-31 sign shall have an appropriate arrow.

Option:

Except as stated in the following standard, the M1-30 and M1-31 signs may be posted on existing sign posts or, if necessary, on separate posts.

Standard:

The M1-30 and M1-31 signs shall not be posted on the face side of STOP or YIELD sign posts.
