

Fatal Crash Exclusion List		
	Crash Type	Note
1	Crashes on Freeways	Consider requesting a crash analysis and investigating if safety concerns are raised by the Division, Media, Government Official, or citizen. Crashes involving any barrier system other than concrete barrier should not be excluded. These crashes are used as part of NC's in-service guardrail evaluation. Discretion can be used regarding exclusion when the barrier impact was secondary to the main crash event.
2	Crashes on private property (driveways, trails, non-public system streets)	
3	Crashes in public vehicular areas (PVAs)	
4	Crashes on Municipal owned streets	Omit unless asked specifically by the Municipality to investigate the crash
5	Crashes involving motorists eluding police	
6	Crashes involving vehicles that are illegal for highway use (ATVs, dirt bikes, lawn mowers, golf carts, etc.)	Omit all golf cart crashes unless the crash occurred in a municipality or resort community where golf carts are allowed to use state maintained roadways by statute
7	Crashes involving competitive racing, playing chicken, etc.	Consider investigating if a citizen or public official raises safety concerns
8	Crashes involving trees falling on vehicles or in roadway	
9	Crashes involving objects that fall from other vehicles or enter from travel lane	
10	Crashes involving broken down vehicles in travel lane	
11	Crashes involving passengers that fall from a vehicle or bed of a truck without a vehicular crash occurring	
12	Crashes involving pedestrians (over 16 years of age) struck at night on a rural road	Consider investigating if a citizen or public official raises safety concerns
13	Crashes involving pedestrians (over 16 years of age) lying in road	
14	Crashes involving pedestrians (over 16 years of age) running into roadway	
15	Crashes involving animal hits	Request a crash analysis for wild animal hits. If a pattern exists, consider investigating the need for crossing signs.
