

Future Interstate Route Signs

Option:

Facilities that are opened to traffic and will eventually be designated as interstate routes, but do not currently meet all interstate classification requirements, may be signed as future interstate routes.

Standard:

If the interstate shield is desired on the sign, it shall not contain the message INTERSTATE within the shield and the word FUTURE shall be placed above the shield. These installations shall be on green background guide signs rather than on standard F assembly installations and only placed along the corridor, as confirming route markers. Signs shall not be placed on ramps or highways approaching future interstate routes. Upon completion of the route upgrade or corridor completion, the FUTURE sign shall be removed.
