

## **Section 2E.05 Retroreflectorization and Illumination**

### **Standard:**

**All guide signs shall be retroreflective regardless of any illumination.**

**The following overhead guide signs shall be illuminated:**

- A. Exit direction signs**
- B. Minimum of one advance guide sign for exit**
- C. Advance and exit direction signs for left exits**
- D. Diagrammatic signs**
- E. Lane designation signs at route splits**
- F. Signs at ramp splits**
- G. Signs on roadways with four or more through lanes**
- H. Regulatory and warning signs**
- I. Signs with obstructed or limited sight distance (signs with less than 1,200 feet (370 m) of continuous, unobstructed sight distance)**
- J. Signs on roadways in areas with two or more through lanes in each direction with traffic volumes at, near, or exceeding capacity, truck traffic of 10% or more, and a speed limit of 45 mph (70 km/h) or more**

### **Guidance:**

All other overhead guide signs, other than span wire installations, should be illuminated when practical.
