

[TE-PS-17] TELEPHONE SIGNS

The NCDOT will approve and allow placing of standard telephone signs on the right of way, except on the interstate system, but only in respect to outdoor telephone booths where service is available on a twenty-four hour basis. Requests for permission to place TELEPHONE signs should be made to the highway Division Engineer having jurisdiction in the county in which the signs are proposed. If approved, they are to be installed at locations approved by the NCDOT and maintained by the telephone company at no cost to the NCDOT. The NCDOT reserves the right to remove any such signs that are not properly placed or maintained.
