[Fwd: Strobe Lights in Traffic Signals]

Please be aware of the attached memorandum from the FHWA to the Florida DOT in which the FHWA's position on strobe lights in traffic signals is that they "are not an approved traffic control device, and therefore [the FHWA does] not plan to add them to the MUTCD."

As such, consideration should be given for removal of existing strobe lights from traffic signals as they are discovered and this office should be notified so that a plan of record can be generated, if necessary.

Thank you in advance for your cooperation on this matter.
