Catalog introduction and use

The State Road Maintenance Unit’s Technical Training Course Catalog is designed to provide employees within NCDOT a resource for self-study courses, operations procedural manuals, limited safety manuals and general equipment guides.

The catalog is broken down into various sections within NCDOT, each containing a brief description of the training courses, manuals, equipment guides or procedures that are specific to that unit. NCDOT employees should follow the procedures listed in that section to order materials as needed.

Should you have a question or concern about a course or manual in this catalog, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.

NOTES:

(1) Mandatory refresher training may be conducted if there are significant policy changes.

(2) Completion of ADA/Blood-borne Pathogens (PER500-S), ADA/Blood-borne Pathogens for Managers and Supervisors (PER511-S) or In Service –Blood-borne Pathogens (LEO387-S) satisfies this requirement.

(3) Completion of Workplace Violence (PER650-P) or Workplace Violence Awareness (PER655-P) satisfies this requirement.

(4) Completion of Unlawful Workplace Harassment (PER680-P) satisfies this requirement.
Bridge Maintenance Section (BRG)

The Bridge Maintenance program falls under the Bridge Management Unit of NCDOT. Contained within this section are classroom courses, self-study courses and general skill set manuals.

To request a manual or course from this section go to page ME51N in the SAP system and request the number of manuals or courses needed by creating a Standard Requisition from Central Inventory.

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
BRIDGE MAINTENANCE

BRG 125T PERSONAL PROTECTIVE EQUIPMENT
Description: This session includes the training required by the new OSHA Standard, 1910.132(f), for each employee who must wear Personal Protective Equipment (PPE). The course addresses the necessary PPE to use and its proper wear and adjustment. Also discussed are the limitations, the proper care, maintenance, and disposal of PPE. Specific items covered include protection for eyes and face, the head, hands, feet and protection against noise. The Coastal video tape "Personal Protective Equipment-You're Covered" is shown and discussed.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: 1 hour
Examination: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification: None

BRG 150T SAFE CRANE OPERATION
Description: This course provides participants with the knowledge and skills needed for proper crane operation, maintenance and safety.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification: Yes

BRG 160T REINFORCING STEEL
Description: This Procedural Training Guide will provide the trainee with information needed to provide knowledge and skills in the placing and tying of reinforcing steel. The following topics are covered: Safety, Reinforcing Steel: bar size, bar bending, bar splicing, unloading hoisting, bar tying, bar cover, bar support, temperature and shrinking, welding, epoxy, dowels, reinforcing steel drawings, review, and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification: Yes
**Type:** Self-study/OJT  
**Target Audience:** Bridge Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Bridge Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:**

---

**BRG 170T   PILE DRIVING**  
**Description:** This Procedural Training Guide will provide the trainee with information needed to provide knowledge and skills needed to handle piles, prepare pile templates, drive piles, keep pile records, determine capacity, splice piles, cutoff piles and preparing pile points. The following topics are covered: Safety, Pile setting: type of pile, handling, pile templates, pile driving, plumbing and aligning, splicing, pile capacity, pile record, pile cutoff, pile points, and Instructor’s Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Bridge Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Bridge Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:**

---

**BRG 180T   DIRECTING PILE DRIVING**  
**Description:** This Procedural Training Guide will provide the trainee with information needed to provide knowledge and skills needed to direct the driving of piles. The following topics are covered: Safety, purpose of foundation, determining pile length, pile driving record, determining anticipated pile penetration, pile capacity, pile cutoff, NCDOT Standard Specifications, Operator Manual, and Instructor’s Guide. This guide is designed to be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.
Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification: BRG 190T PIPE INSTALLATION AND MAINTENANCE OF 54” AND LARGER
Description: This Procedural Training Guide will provide the trainee with information needed to install, compute length and perform maintenance of 54” pipe or larger. The following topics are covered: Safety, pipe installation, pipe installation standards, camber calculations, pipe length calculations, pipes maintenance, and Instructor’s guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification: BRG 195T CONCRETE FORM CONSTRUCTION
Description: This Procedural Training Guide will provide the trainee with information needed to provide knowledge and skills in construction of concrete word forms. The following topics are covered: Safety, site lines lay out, forms introduction, materials, footing forms, anchor bolts, double wall forms, column forms, steps, and Instructor’s guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Bridge Maintenance
Prerequisites: None
Cost: None
Certification:
BRG 205T INSTALLATION AND MAINTENANCE OF EROSION CONTROL DEVICES

Description: This Procedural Training Guide will provide the trainee with information needed to provide knowledge and skills in temporary erosion control devices most commonly used during construction activities and the basic procedures used during their installation. The following topics are covered: function of the device, required materials, installation, maintenance, and typical problems. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

BRG 210T EROSION CONTROL DESIGN MODULE, BRIDGE MAINTENANCE

Description: This Procedural Training Guide will provide the trainee with information needed to gain knowledge and skills in department erosion control plan design and implementation concepts, characteristics, and programs. The following topics are covered: Erosion Control Responsibilities, Erosion Control Policy and Procedures, Plan Development and Design, Environmental Rules and Regulations. This training guide can be used as a reference guide only, as a supplement to classroom instruction. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Bridge Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

BRG 310T STEEL BRIDGE DESIGN USING AASHTO LRFD BRIDGE DESIGN SPECIFICATION (2001 INTERIM)

Description: The course is devoted to design of steel bridges using the AASHTO LRFD Bridge Design Specifications. It will include background of code changes,
cost effective details for steel bridges, seismic design issues and short examples demonstrating the application of the LRFD code.

Type: Provider: 
Target Audience: PREREQUISITES: None 
Length of Course: 1.5 hours Cost: Certification: 
Examination: 
PDH: None

BRG350T ABRASIVE BLASTING AND POWER TOOLS FOR COATING REMOVAL
Description: The completion of this course will provide the trainee with the information and skill to operate both abrasive blasting and power tool for surface coating removal. The following topic will be covered: use of air compressor for operation of power tools, personal protective equipment associated with silica or lead, containment and clean up of debris and maintenance of equipment associated with abrasive blasting.

Type: Classroom training Provider: Bridge Maintenance 
Target Audience: Bridge Prerequisites: None 
Maintenance employees Cost: None 
Length of Course: 8 hours Certification: None 
Examination: None 
PDH: None

BRG 351T LEAD IN CONSTRUCTION WORKER REFRESHER
Description: This refresher course is available for those who are subject to lead exposure in the workplace. The Coastal video “Lead: Treat It with Respect” will be shown and will include: lead and health hazards; exposure limits; personal protective equipment; housekeeping and medical surveillance. The class will conclude with a discussion period, recent lead removal results and a review of the Compliance Plan.

Type: Classroom training Provider: Bridge Maintenance 
Target Audience: Bridge Prerequisites: None 
Maintenance employees Cost: None 
Length of Course: 1 hour Certification: Required annually 
Examination: None 
PDH: None

BRG 355T CRANE CERTIFICATION AND RECERTIFICATION
Description: Satisfactory completion of this course will result in the certification or rectification of the operator. The course material covers operator familiarity with the
safe operating procedures. In addition, it teaches the operator how to read load charts.

**Type:** Classroom training  
**Target Audience:** Bridge Maintenance employees  
**Length of Course:** 24 hours  
**Examination:** Yes  
**PDH:** None  

**Provider:** Bridge Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:** Yes

**BRG 562T STANDARD SPECIFICATIONS FOR ROADS AND STRUCTURES (SECTIONS 420 AND 1000)**

**Description:** This Procedure Training Guide will provide the trainee with information provided in Section 420 and 1000 of Standard Specifications for Roads and Structures. The following topics will be covered: Concrete Structures, Portland Cement Concrete Production and Delivery, and the Instructor's guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Bridge Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Bridge Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:**

**BRG 563T BASIC CARPENTER WORK**

**Description:** This Procedural Training Guide will provide the trainee with information needed to maintain and operate carpenter tools. The following topics will be covered: Safety, Chisel, Hand Saw Ladder, Level, Nail Hammer, Drill, Circular Saw, Reciprocating Saw, Pry Bar, Rule, Screwdriver, Sledge Hammer, Squares, and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:**  
**Target Audience:** Bridge Maintenance employees

**Length of Course:** At own pace  
**Examination:** Yes  
**Provider:** Bridge Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:**  

**BRG 573T DRILLING AND CUT METAL**  
**Description:** This Equipment Training Guide will provide the trainee with information needed to become proficient in the use of tools used to drill and cut structural steel to close tolerance. The following topics will be covered: Safety, Electromagnetic Drill Press, Portable Band Saw, Reamer, Auger Grinder, and Fitting Structural Steel. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.
Equipment Section

The State Road Maintenance Training Section of NCDOT maintains a department specific set of equipment operator’s manuals. Contained within this section are classroom courses, self-study courses and general skill set manuals.

To request a manual or course from this section go to page ME51N in the SAP system and request the number of manuals or courses needed by creating a Standard Requisition from Central Inventory.

Should you have a question or concern about a course or manual within a specific section, please contact Lee Johnson at (919) 733-3725 or email: leejohnson@ncdot.gov.
EQUIPMENT SECTION

EQP 400T  AIR COMPRESSOR
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Air Compressor. The following topics will be covered: Safety, Equipment Maintenance, Equipment Operations and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  Provider: State Road Maintenance
Target Audience: Maintenance employees  Prerequisites: None

EQP 405T  AUGER AND POST DRIVER
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Auger. The following topics will be covered: Safety, Pre-start, Pre-operations, Shut-down, Equipment Maintenance, Equipment Operations, Equipment Transport, and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  Provider: State Road Maintenance
Target Audience: Maintenance employees  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None

EQP 410T  COMPACTOR: SKID, JAY, BACKFILL
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Skid, Jay, and Backfill Compactors. The following topics will be covered: Terms and Definitions,
Safety, Equipment Maintenance, Equipment Operations, and Instructor's guide. This
guide can be used as a self-study guide. There should be an OJT instructor assigned
who has experience with this equipment, and can provide answers to questions that
the trainee may have. NCDOT employees may obtain this guide from the Central
Equipment and Inventory Control Computerized Requisition Program accessible
through SAP.

**EQP 415T DUMP TRUCK**

**Description:** This Equipment Training Guide will provide the trainee with information
needed to understand the operations, care and safety concerns for the Dump Truck.
The following topics will be covered: Terms and Definitions, Safety, Equipment
Controls and Instruments, Equipment Maintenance, Equipment Operations, Equipment
Transport and Instructor's Guide. This guide can be used as a self-study guide. There
should be an OJT instructor assigned who has experience with this equipment, and
can provide answers to questions that the trainee may have. NCDOT employees may
obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**EQP 420T MOWER ATTACHMENTS**

**Description:** This Equipment Training Guide will provide the trainee with information
needed to understand the operations, care and safety concerns for the Sickle Bar,
Rotary, Flail, Mott, Batwing, A-Boom and Boom-Axe Mowers. The following topics
will be covered: Safety, Mowing Operations, Typical Mowing Patterns, Equipment
Maintenance, Equipment Operations and Instructor's Guide. This guide can be used
as a self-study guide. There should be an OJT instructor assigned who has
experience with this equipment, and can provide answers to questions that the trainee
may have. NCDOT employees may obtain this guide from the Central Equipment
and Inventory Control Computerized Requisition Program accessible through SAP.
### EQP 425T  SHEEP FOOT ROLLER

**Description:** This Equipment Training Guide will provide the trainee with information needed to understand the operations, care, and safety concerns for the Sheep Foot Roller. The following topics will be covered: Safety, Equipment Maintenance, Equipment Maintenance Operations and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**EQP 539T  INCIDENT MANAGEMENT ASSISTANCE PATROL (IMAP) TRUCK**

**Description:** This Equipment Training Guide provides information on the operation, maintenance, safety concerns and preventive maintenance for the IMAP Truck. This guide can be used as a self-study guide for the Transportation Worker in the Incident Management Unit. It will help the trainee master the skills in operating the IMAP Truck. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain revised copies of this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** State Road Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

---

**EQP 540T  WIDENING MACHINE**

**Description:** This Equipment Training Guide will provide the trainee with information needed to understand the operations, maintenance and safety concerns for the Widening Machine. The following topics will be covered: Safety, Pre-start, Pre-operation, Shutdown, Operations, and Transporting. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment and can provide answers to questions that the trainee may have. NCDOT employees may obtain revised copies of this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** State Road Maintenance  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None
EQP 541T   DITCHING MACHINE
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Ditching Machine. The following topics will be covered: Safety, Parts, Pre-start, Pre-operation, Shutdown, Operations, and Instructor’s Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment and can provide answers to questions that the trainee may have. NCDOT employees may obtain revised copies of this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 542T   ASPHALT KETTLE
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Asphalt Kettle. The following topics will be covered: Safety, Parts, Pre-start, Pre-operation, Shutdown, Operations, and Instructor’s Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 543T   ASPHALT DISTRIBUTOR TRUCK MOUNTED (THERMOLAY)
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Asphalt Distributor Truck Mounted (Thermolay). This guide can be used as a self-study guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.
EQP 544T   ASPHALT PATCHING MACHINE (AMZ)

Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Asphalt Patching Machine (AMZ). This guide can be used as a self-study guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 545T   MOTOR GRADER MOWER

Description: This Equipment training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for the Motor Grader Mower. This guide can be used as a self-study guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None
EQP 546T  PAVER (SELF-PROPELLED)
Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Self-propelled Paver. The following topics are covered: Safety, Paver Parts, Pre-start, Pre-operation, Shutdown, Operations, Transport, and Instructor's Guide. This guide is can be used as a self-study guide. There should be an OJT instructor should be assigned who has experience with this equipment and who can provide answers to questions by the trainee. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 547T  SNOW BLOWER
Description: This Equipment training guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Snow Blower. The following topics will be covered: Safety, Parts, Equipment Operations, and Instructor’s Guide. This guide is can be used as a self-study guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 548T  SPECIALIZED MOWERS
Description: This Equipment Training guide will provide an overview of safe operation of Specialized Mowers used by NCDOT. The following topics will be covered: safety, dressing for the job, mowing operations and mower precautions. This guide can be used as a self-study guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to
questions that the trainee may have. NCDOT employees may obtain this guide from
the Central Equipment and Inventory Control Computerized Requisition Program
accessible through SAP.

**Type:** Self-study/OJT
**Target Audience:** Maintenance employees
**Length of Course:** At own pace
**Examination:** Yes
**PDH:** None

**Provider:** State Road Maintenance
**Prerequisites:** None
**Cost:** None
**Certification:** None

**EQP 549T   ASPHALT MAINTAINER (LEE BOY)**

**Description:** This Equipment Training Guide will provide the trainee with information
needed to understand the operations, care and safety concerns for operating the
Asphalt Maintainer (Lee Boy). The following topics will be covered: Safety, Parts,
Equipment Maintenance, Equipment Operations, and Instructor’s Guide. This guide
can be used as a self-study guide. There should be an OJT instructor assigned who
has experience with this equipment, and can provide answers to questions that the
trainee may have. NCDOT employees may obtain this guide from the Central
Equipment and Inventory Control Computerized Requisition Program accessible
through SAP.

**Type:** Self-study/OJT
**Target Audience:** Maintenance employees
**Length of Course:** At own pace
**Examination:** Yes
**PDH:** None

**Provider:** State Road Maintenance
**Prerequisites:** None
**Cost:** None
**Certification:** None

**EQP 550T   PIPE CLEANER**

**Description:** This Equipment Training Guide will provide the trainee with information
needed to understand the operations, care and safety concerns for operating the
Pipe Cleaner. The following topics are covered: Safety, Parts, Equipment
Maintenance, Equipment Operations, and Instructor’s Guide. This guide can be used
as a self-study guide. There should be an OJT instructor assigned who has
experience with this equipment, and can provide answers to questions that the
trainee may have. NCDOT employees may obtain this guide from the Central
Equipment and Inventory Control Computerized Requisition Program accessible
through SAP.
**Type:** Self-study/OJT  
**Provider:** State Road Maintenance  
**Target Audience:** Maintenance employees  
**Prerequisites:** None  
**Length of Course:** At own pace  
**Cost:** None  
**Examination:** Yes  
**Certification:** None  
**PDH:** None

---

**EQP 554T   SKID STEER**

**Description:** This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Skid Steer. The following topics will be covered: Safety, Parts, Equipment Maintenance, Equipment Operations, and Instructor’s Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Provider:** State Road Maintenance  
**Target Audience:** Maintenance employees  
**Prerequisites:** None  
**Length of Course:** At own pace  
**Cost:** None  
**Examination:** Yes  
**Certification:** None  
**PDH:** None

---

**EQP 556T   VIBRATOR ROLLER**

**Description:** This equipment-training guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Vibrator Roller. The following topics will be covered: Safety, Parts, Equipment Maintenance, Equipment Operations, and Instructor’s Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.
Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 557T  ROLL BACK CARRIER

Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Roll Back Carrier. The following topics will be covered: Equipment Safety, Preventive Maintenance, Checks, Basic Operations, and Equipment Transporting. The trainee should be aware that each county may not have the same make truck. It will be up to the trainee to learn to use the equipment training guide, the operator’s manual, and any other training guides that may be available in order to become familiar with the truck before beginning on-the-job training. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

EQP 559T  COMPUTER CONTROLLED PESTICIDE APPLICATOR <300 GALLONS

Description: This Equipment Training Guide will provide the trainee with information needed to operate the Comp. Controlled Pesticide Applicator <300 Gallons. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment and can provide answers to questions that the trainee may have. NCDOT employees may obtain revised copies of this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.
EQP 560T  TRACK LOADER

Description: This equipment-training guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Track Loader. The following topics will be covered: Safety, Parts, Equipment Maintenance, Equipment Operations, and Instructor's Guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  
Target Audience: Maintenance employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: State Road Maintenance  
Prerequisites: None  
Cost: None  
Certification: None

EQP 561T  STREET SWEEPER

Description: This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Street Sweeper. The following topics will be covered: Safety, Parts, Equipment Maintenance, Equipment Operations, and Instructor's Guide. There should be an OJT Instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  
Target Audience: Maintenance employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: State Road Maintenance  
Prerequisites: None  
Cost: None  
Certification: None
### EQP 565T   TRUCK MOUNTED CRANE

**Description:** This Equipment Training Guide will provide the trainee with information needed to understand the operations, care and safety concerns for operating the Truck Mounted Crane. The following topics will be covered: Safety, Parts, Equipment Maintenance, Equipment Operations, and Instructor’s Guide. This guide can be used as a self-study guide. An OJT instructor should be assigned who has experience and who can provide answers to questions raised by the trainee; NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Maintenance Section

The State Road Maintenance Training Section of NCDOT maintains the technical maintenance procedural manuals and courses. Contained within this section are classroom courses, self-study courses and general skill set manuals.

To request a manual from this section go to page ME51N in the SAP system and request the number of manuals needed by creating a Standard Requisition from Central Inventory.

To request a course listed in this section see your Supervisor or Division Training Coordinator to be enrolled

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
MAINTENANCE SECTION

MNT 200T Maintenance Management System (MMS) Training - Clerks
Description: This course is designed to assist maintenance clerks in the use of MMS. The major topics that will be covered include:
  o Overview of System Functionality
  o SAP / MMS connections
  o Finding and Correcting Errors in SAP
  o Creating Tasks and Service Requests
  o Basic Reporting

Type: Computer/Classroom Trng.  Provider: SRMU
Target Audience: Office Assts./Clerks  Prerequisites: Basic Computer Skills
Length of Course: 6 hours  Cost: None
Examination: None  Certification: None
PDH: None

MNT 205T Maintenance Management System (MMS) Training - Supervisors
Description: This course is designed to assist maintenance supervisors in the use of MMS. The major topics that will be covered include:
  o Overview of System Functionality
  o Creating Tasks and Service Requests
  o Capturing and using Road History
  o Mileposts and Milepost maps
  o Reporting and Mapping

Type: Computer/Classroom Trng.  Provider: SRMU
Target Audience: Maint. Supervisors  Prerequisites: Basic Computer and Spreadsheet Skills
Length of Course: 8 hours  Cost: None
Examination: None  Certification: None
PDH: None
MNT 210T Maintenance Management System (MMS) Training - Engineers

Description: This course is designed to assist maintenance engineers in the use of MMS. The major topics that will be covered include:
  - Overview of System Functionality
  - In depth Report Creation
  - Map creation
  - Budget Planning and Analysis
  - Division Work Plan

Type: Computer/Classroom Trng.  Provider: SRMU
Target Audience: Maint. Engineers  Prerequisites: Advanced Computer and Spreadsheet Skills
Length of Course: 8 hours  Cost: None
Examination: None  Certification: None

MNT 350T ASPHALT EMULSION - STORAGE AND HANDLING

Description: This classroom presentation and/or self-study course is designed for field maintenance personnel to demonstrate the proper methods of use and handling of emulsified asphalt. The following topics will be covered in this course: basics of asphalt emulsion, storage requirements of asphalt emulsion, review of different types of storage tanks, how to load, unload, and maintain storage tanks, daily storage tank inspection, sampling procedures, and safe heating of asphalt emulsion. A written test is included in the course study as well as field OJT given by the supervisor. On-the-Job Training would be necessary for the employee to become qualified. Upon completing the qualification steps it should be recorded in the employee’s file. This presentation can be obtained from the Central Equipment and Inventory Control Computerized Request Program accessible through SAP.

Type: Classroom or Self-study/OJT  Provider: State Road Maintenance
Target Audience: Employees who manage, maintain, or inspect the yards bulk storage facility as well as any employee who loads or unloads at this facility.
Prerequisites: None  Cost: None
Length of Course: 4 hours  Certification: None
Examination: Yes  PDH: None

MNT 460T WINTER WEATHER OPERATIONS

Description: This course discusses standard methods for controlling snow and ice events explore new techniques available to Road Maintenance Managers. Time is

Revised May 2012  47  Technical Course Catalog
spent determining equipment and materials needs for jurisdictional area, and
developing a plan for using these resources efficiently. Some of the physical and
chemical science aspects of the melting process are also discussed along with
review of recommended methods and material application rates for different types of
winter event. This course is recommended for Journey and Advanced Level
Transportation Supervisors and all Maintenance Engineers every three years.

**MNT 461T  SNOW & ICE CONTROL FOR OPERATORS**

**Description:** This course is designed for operators and their immediate supervisors.
Plowing and material application techniques are discussed and time is spent
explaining new techniques available for controlling snow and ice. The melting
process and discussion of the amount of materials needed to effectively maintain
this process is also included. This course is recommended for Transportation
Workers and Contributing Level Transportation Supervisors every two years.

**Type:** Classroom training  
**Target Audience:** Equipment operators & their supervisors  
**Length of Course:** 4 hours  
**Examination:** Yes  
**PDH:** None

**Provider:** State Road Maintenance Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

**MNT 475T  GUARDRAIL DESIGN, INSTALLATION AND MAINTENANCE**

**Description:** This course covers decision-making criteria for designers and the various
types of guardrail hardware and end treatments.

**Type:** Classroom training  
**Target Audience:** Maintenance & construction engineers  
**Length of Course:** 6 hours  
**Examination:** None  
**PDH:** 7 hours

**Provider:** ITRE  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None
MNT 480T  BRICK AND BLOCK WALL CONSTRUCTION
Description: This self-study course will provide information needed to construct brick and block walls. The following topics will be covered: Safety, How to Build Brick Walls, How to Build Block Walls, and How to Mix Mortar. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 481T  DRAINAGE EXCERPTS & PIPE INSTALLATION
Description: This Procedure Training Guide will provide the trainee with information needed to understand the drainage regulations that are important to field employees and methods of pipe installation. The following topics will be covered: drainage laws and policies and pipe installation. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 482T  FIELD MAINTENANCE MANUAL
Description: This Procedure Training Guide will provide the trainee with a collection of policies, regulations and laws that influence the field personnel. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has knowledge of policies, regulations and laws that influence field personnel. Once the field maintenance manual test has been completed and passed, the trainee will be eligible for qualification. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None
MNT 483T INCIDENTAL CONCRETE CONSTRUCTION
Description: This Procedure Training Manual will provide the trainee with information needed to understand the basic procedures in concrete construction. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None
Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 486T ROADWAY DRAINAGE MAINTENANCE
Description: This course covers drainage principles, installation and maintenance, inspections, policies and procedures.

Type: Classroom training
Target Audience: Maintenance managers & supervisors
Length of Course: 6 hours
Examination: None
PDH: None
Provider: State Road Maintenance Unit
Prerequisites: None
Cost: None
Certification: None

MNT 488T FUNCTION CODE TRAINING WORKSHOP (Ask Lonnie)
Description: This course is designed to aid Transportation Supervisors and County Maintenance Engineers in daily work order cost accounting. Transportation Supervisor III and County Maintenance Engineers will also discuss methods of work planning and resource leveling.
Type: Classroom
Target Audience: Maintenance managers and supervisors
Length of Course: 4 Hours
Examination: None
PDH:

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 489T ELEVATION & GRADE INSTRUMENTS AND USE
Description: This Procedure Training Guide will provide the trainee with information needed to understand the instruments and methods needed to check elevations and set grades. The following topics will be covered: stick rule, fabric type, level rod, hand level, tripod, and level. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with the use of level instruments and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 490T RENTAL EQUIPMENT SUPERVISION
Description: This Procedure Training Guide will provide the trainee with information needed to understand the procedures for supervising rental equipment. The following topics will be covered: safety, administering the rental equipment, fully operated rental equipment, DOT operated rental equipment, and instructor’s guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with the supervising of Rental Equipment. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None
MNT 491T  FORCE ACCOUNT CONSTRUCTION
Description: This Procedure Training Guide will provide the trainee with information needed to understand the procedure for building a road or road segments by Force Account Construction. The following topics will be covered: safety, construction outline, clearing and grubbing, outlet ditching, rough grading, fine grading, base material, compaction, miscellaneous functions, and instructors guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with road construction. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  
Target Audience: Maintenance employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: State Road Maintenance  
Prerequisites: None  
Cost: None  
Certification: None

MNT 492T  FENCE INSTALLATION
Description: This Procedure Training Guide will provide the trainee with information needed to understand the procedure for constructing 6 types of fences. The types of fences are: woven wire fence with wood post, woven wire fence with metal post, livestock woven wire metal post, livestock barbed wire fence, chain link fence, and high tensile fence. The following topics will be covered: safety, hardware, recommended tools, layout, digging post holes, setting post, bracing, fence erection, erecting gates, ditch crossing and sharp grade breaks, review, and instructor's guide. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with fence construction. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

Type: Self-study/OJT  
Target Audience: Maintenance employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: State Road Maintenance  
Prerequisites: None  
Cost: None  
Certification: None

MNT 493T  CONCRETE PAVEMENT PROGRAM
Description: This Procedure Training Guide will provide the trainee with information needed to understand the procedure for patching concrete pavement. The following
topics are covered: safety, temporary patching, patching of non-reinforced concrete pavement, patching of reinforced concrete pavement, maintenance of joints and/or cracks, instructor’s guide and certification test. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT

**Target Audience:** Maintenance employees

**Length of Course:** At own pace

**Examination:** Yes

**PDH:** None

**Provider:** State Road Maintenance

**Prerequisites:** None

**Cost:** None

**Certification:** None

---

**MNT 494T ASPHALT PAVEMENT PATCHING**

**Description:** The classroom presentation and/or self-study will provide the employee with information needed to understand the procedure for patching asphalt pavements. The following topics are covered: manual patching, mechanical patching, AST patching, full depth patching using asphalt plant mix and AST, and crack pouring. A written test is included in the course study as well as field OJT given by the supervisor. **On-the-Job Training** would be necessary for the employee to become qualified. Upon completing the qualification steps it should be recorded in the employee’s file. This presentation can be obtained from the Central Equipment and Inventory Control Computerized Request Program accessible through SAP.

**Type:** Classroom or Self-study

**Target Audience:** Maintenance employees who have minimal asphalt experience.

**Length of Course:** 4 hours

**Examination:** Yes

**PDH:** None

**Provider:** State Road Maintenance

**Prerequisites:** None

**Cost:** None

**Certification:** None

---

**MNT 495T SHOULDER AND DITCH MAINTENANCE**

**Description:** This Procedure Training Guide will provide the trainee with information needed to understand the procedure of performing shoulder and ditch maintenance of paved and unpaved roads. The following topics will be covered: safety, FC 441 and 442 (maintenance of unpaved shoulders and side ditches on paved roads), FC 464 (maintenance of upward side ditches on unpaved roads). This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment and can provide the necessary test for certification.
NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**MNT 496T  GUARDRAIL INSTALLATION AND REPAIR**

**Description:** This Procedure Training Guide will provide the trainee with information needed to install and repair guardrail. The following topics will be covered: safety, type guardrail and end treatment, design elements, and structural characteristics, repair of guardrail and maintenance of guardrail. This guide can be used as a self-study guide. There should be an OJT instructor assigned who has experience with this equipment and can provide the necessary test for certification. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Provider:** State Road Maintenance

**Prerequisites:** None

**Cost:** None

**Certification:** Yes

**Type:** Self-study/OJT

**Target Audience:** Maintenance employees

**Length of Course:** At own pace

**Examination:** Yes

**PDH:** None

**MNT 497T  ASPHALT PAVEMENT PRESERVATION**

**Description:** This training will describe Preservation practices, techniques, and philosophy. Target audiences for this training are managers and those individuals that are choosing pavement preservation applications for specific roadway sections. Additionally individuals charged with the developing and letting pavement preservation activities to contract could also benefit. This includes Transportation Supervisor III, County Maintenance Engineers, Bituminous Supervisors, District Engineers, Project Managers, and Division Maintenance Engineers.

**Provider:** State Road Maintenance Unit

**Prerequisites:** None

**Cost:** None

**PDH:** 3 Hours
MNT 505T  TECHNICAL ON THE JOB TRAINING QUALIFICATION
Description: This course is designed for OJT instructors. It is intended for all employees that have been identified as mentors, OJT instructors, or OJT trainers. The objectives of this course are:

1. To understand how on-the-job training is designed.
2. To understand the importance of matching the training to the training objectives.
3. To understand OJT learning guidelines.

This course is limited to a maximum of eight participants per session.

Type: Classroom training
Target Audience: Employees that have OJT instructor/trainer duties
Length of Course: 4 hours
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 510T  CONTRACT MANUAL
Description: This course introduces middle and upper management to the Contract Manual. Participants are provided with information on both Division and Purchase Order Contracts that are informally bid by field units for small projects and service contracts. The guide discusses preparing and administering both types of contracts as well as issues relating to contracts for Federal Aid and Small Business projects. Time is also spent discussing how to use bonds in these contracts. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have.

Type: Self-study/OJT
Target Audience: Maintenance employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 564T  INSTALLATION AND MAINTENANCE OF EROSION CONTROL DEVICES
Description: This Self-study/OJT course will familiarize the trainee with those temporary erosion control devices most commonly used during construction activities and the basic procedures used during their installation. The following topics are covered: function of the device, required materials, installation, maintenance, and typical problems. This guide can be used as a self-study guide.
There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**MNT 579T  SECURING AND HAULING CARGO**  
**Description:** This Procedural Training Manual will provide the trainee with information needed to tie down and haul cargo including equipment. The following topics will be covered: safety, securing cargo, hauling cargo, instructor’s guide, and certification test. This manual can be used for self-study. There should be an OJT instructor assigned who has experience with this equipment, and can provide answers to questions that the trainee may have. NCDOT employees may obtain this guide from the Central Equipment and Inventory Control Computerized Requisition Program accessible through SAP.

**Type:** Self-study/OJT  
**Target Audience:** Maintenance employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**MNT 700T  MAINTENANCE CONDITION ASSESSMENT - NEW**  
**Description:** This course was designed to train new assessment teams on how to evaluate the condition of multitude roadway features during the annual Maintenance Condition Assessment that is used to report the condition of the highway system to the Legislature.

**Type:** Classroom training  
**Target Audience:** New assessment teams  
**Length of Course:** 12 hours  
**Examination:** None  
**PDH:** 9 hours
MNT 800T  CONTRACT INSPECTIONS FOR TWs/TS1s
Description: This course is designed to train TWs and TS1s on the following aspects of the contract inspection process:

1. Why These Inspections Are Necessary
2. Become Familiar with the Tasks of the Inspector
3. Understand the Contract and Inspection Process
4. Problem Solving and Decision Making Skills
5. Inter-Personal Relationship Skills
6. Pit Falls for Inspectors, (What to avoid!)

Type: Classroom training
Target Audience: Employees that inspect NCDOT contracts
Length of Course: 4 hours
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

MNT 810T  THE TW’S TRANSITION TO LEADERSHIP
Description: The transition from employee to lead worker can be difficult. One day you receive instructions, the next day you give instructions. This course looks at the characteristics of good leadership. It moves into the different styles of leadership. Communications skills are essentials. The class identifies ways to overcome communications barriers typically encountered at a job site. Problem solving and decision making are discussed through the use of a group activity.

Type: Classroom training
Target Audience: Transportation Workers
Length of Course: 4 hours
Examination: Yes
PDH: None

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None
The Roadside Environmental Unit of NCDOT maintains the REU procedural manuals and courses. Contained within this section are classroom courses, self-study courses and general skill set manuals.

To request a manual or course from this section go to page ME51N in the SAP system and request the number of manuals or courses needed by creating a Standard Requisition from Central Inventory.

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
ROADSIDE ENVIRONMENTAL

REU 100T  DICKEY-JOHN EQUIPMENT TRAINING
Description: This course provides Roadside Environmental Unit personnel with the necessary training to operate the Dickey-John automated sprayer control systems installed on roadside spray equipment. The following topics will be covered: the input of system operation data, calibration of equipment, and system trouble shooting. Upon completion of this course the equipment operators should have received the technical training to correctly use the system.

Type: Classroom  Provider: 
Target Audience:  Prerequisites: None
Length of Course: 3 hours  Cost: 
Examination:  Certification: 
PDH: None

REU 140T  INTRODUCTION TO EROSION CONTROL - LEVEL 1
Description: This Self-Study Course will introduce the trainee to factors that directly influence erosions and sedimentation damage; and the basic principles of erosion control used by the Department during construction activities. The following topics will be covered: Erosion and Sedimentation, Factors that Influence Erosion and Sedimentation, Importance of Erosion Control, Erosion and Sedimentation Law and Delegation Agreement, Principles of Erosion Control. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT  Provider: Roadside Environmental
Target Audience: Operations employees  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None

REU 150T  EROSION AND SEDIMENT CONTROL PLANNING A
Description: This is an erosion control course for division construction and maintenance personnel who have the responsibility of preparing sediment and erosion control plans. The following topics will be covered: technical aspects of plan concepts and design, construction parameters and functions of erosion control devices, and field implementation of erosion control plans. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.
REU 151T VEGETATION MANAGEMENT I
Description: This self-study course will introduce the trainee to NCDOT’s Roadside Environmental Unit, Division Roadside Environmental Department, and to some basic vegetation management procedures. The following topics will be covered: Roadside Environmental organizational structure and program descriptions; basic seeding operations; backpack sprayer utilization; and ornamental and tree seedling installation. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Roadside Environmental employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Roadside Environmental
Prerequisites: None
Cost: None
Certification: None

REU 152T VEGETATION MANAGEMENT/PEST MANAGEMENT II
Description: This self-study course will increase the trainee’s familiarity with the NCDOT Pest Management programs. The following topics will be covered: backpack calibration; introduction to pesticide handling and safety; equipment types for pest management; herbicide terminology; basic mathematics and conversion factors. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Roadside Environmental employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Roadside Environmental
Prerequisites: None
Cost: None
Certification: None
REU 153T VEGETATION MANAGEMENT/PEST MANAGEMENT III

**Description:** This self-study course will familiarize the trainee with NCDOT’s turfgrass and vegetation management concepts, characteristics, and control programs. The following topics will be covered: Integrated Roadside Vegetation Management (IRVM); herbicides as a component of IRVM; factors which influence herbicidal activity; DOT Roadside Programs for the control of various vegetation types; turfgrass adaptability zones in North Carolina. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Roadside Environmental employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Roadside Environmental

**Prerequisites:**

**Cost:** None

**Certification:** None

REU 154T INTEGRATED PLANT MANAGEMENT

**Description:** This self-study course will familiarize the trainee with NCDOT's Integrated Plant Management program. The following topics will be covered: Integrated Pest Management (IPM) and Integrated Roadside Vegetation Management (IRVM); the “zone concept” of roadside vegetation management; concepts of plant and pest monitoring, pest biology and ecology, and threshold levels; reasons for an Integrated Roadside Vegetation Management Program; and policies and regulations related to managing vegetation on NC right-of-ways. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Roadside Environmental employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Roadside Environmental

**Prerequisites:**

**Cost:** None

**Certification:** None

REU 155T SOIL STABILIZATION II

**Description:** This self-study course will expose the trainee to two parts of the seeding operation including mulching and the installation establishment of a soil stabilizing turf. The following topics will be covered: Purpose, Material Types, Equipment, and Application Techniques. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Roadside Environmental employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**Provider:** Roadside Environmental

**Prerequisites:**

**Cost:** None

**Certification:** None
Type: Self-study/OJT  
Target Audience: Roadside Environmental employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: Roadside Environmental  
Prerequisites:  
Cost: None  
Certification: None

REU 156T  SOIL STABILIZATION III  
Description: This classroom course will provide an overall view of soil amendments and vegetation currently utilized by the Department. The following topics will be covered: Soil fertility, Vegetation types, Turf-grass establishment, and Turf-grass maintenance. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answers to questions the trainee might have.

Type: Self-study/OJT  
Target Audience: Roadside Environmental employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: Roadside Environmental  
Prerequisites:  
Cost: None  
Certification: None

REU 157T  PESTICIDE HANDLING AND DISPOSAL REGULATIONS  
Description: This self-study course will familiarize the trainee with DOT, NCDA, and CS regulations and procedures for pesticide handling, storage, and disposal. The following topics will be covered: Hazards and Toxicity of Pesticides, Disposal of Pesticides and Pesticide Containers, NC Pesticide Storage Regulations, Spill Prevention and Clean-up, Container Management, Personal Protective Equipment, and NCDOT Pesticide Related Forms. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answers to questions the trainee might have.

Type: Self-study/OJT  
Target Audience: Roadside Environmental employees  
Length of Course: At own pace  
Examination: Yes  
PDH: None  
Provider: Roadside Environmental  
Prerequisites:  
Cost: None  
Certification: None
REU 158T  VEGETATION MANAGEMENT MODULE III
Description: This course will provide the trainee with information needed to increase their understanding of NCDOT’s horticultural applications as a part of the overall Vegetation Management Program. The following topics will be covered: Soil types, Soil fertility and fertilization, and Ornamental Planting. This is a combination classroom and self-study course. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Roadside Environmental employees
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Roadside Environmental
Prerequisites: 
Cost: None
Certification: None

REU 160T  SEDIMENT AND EROSION CONTROL TRAINING FOR CONTRACT CONSTRUCTION PERSONNEL
Description: This is an erosion control short course for Division Contract Construction personnel who have the responsibility of implementing the erosion control plans on contract construction projects. The following topics will be covered: technical aspects of construction parameters and functions of erosion control devices, and field implementation of erosion control plans. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: 
Target Audience: 
Length of Course: 
Examination: 
PDH: None

Provider: 
Prerequisites: 
Cost: 
Certification: 

REU 165T  HORTICULTURAL APPLICATION - LEVEL 2
Description: This course will increase the trainee’s familiarity with NCDOT's Horticultural Applications as a part of the Vegetation Management Program. The following topics will be covered: Maintenance of ornamentals, Pruning principles, and Basic mathematics. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**REU 250T ROADSIDE VEGETATION MANAGEMENT CONFERENCE**

**Description:** This annual conference provides Roadside Environmental Unit personnel with training on a variety of topics pertaining to vegetation management. Although topics vary each year, typical presentations provide technical training relating to roadside vegetation control, new equipment and product up-dates, safety, erosion control, plants and wildflowers, rest area maintenance and contract administration, and new legislation and regulations which affect the department's
activities.

**Type:** Self-study/OJT  
**Target Audience:** Roadside Environmental employees  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None

**REU 300T  PEST MANAGEMENT**

**Description:** This course is designed to provide the trainee with an advanced understanding of pest management issues. The trainee will become familiar with Select-A-Spray, nutating head technology, slow moving caravan operations for pesticide applications, public perception and risk perception. The trainee must perform the duties in a roadside crew for 6 months to the supervisor's satisfaction. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have. The following must be complete within this course:

- Review of written material in this manual.
- Certification Examination.
Type: Self-study/OJT  Provider: Roadside Environmental
Target Audience: Roadside  Prerequisites: None
  Environmental employees  Cost: None
Length of Course: At own pace  Certification: Yes
Examination: Yes  
PDH: None

REU 400T CPESC REVIEW COURSE
Description: Certified Professional in Erosion and Sediment Control, rules and regulations, site planning and management, predicting soil loss, runoff control.
Type: Classroom training  Provider: Roadside Environmental
Target Audience: Engineers  Prerequisites: None
Length of Course: 8 hours  Cost: Yes
Examination: Yes  Certification: None
PDH: 6.5 hours

Work-Zone Safety Classes

Contained within this section are classroom courses developed to meet all Work-zone Safety requirements for NCDOT employees.

To request a course from this section see your Supervisor or Division Training Coordinator to be enrolled.

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
WORK-ZONE SAFETY CLASSES

SAF 238S  FLAGGER TRAINING
Description: This course offers basic flagger safety procedures for work zone areas.

Type: Classroom training  Provider: ITRE
Target Audience: Employees who work as flaggers  Prerequisites: None
Length of Course: 3 hours  Cost: None
Examination: Yes  Certification: None
PDH: None

SAF 239S  FLAGGER INSTRUCTOR TRAINING
Description: This course teaches participants how to conduct training on basic flagging operations.

Type: Classroom training  Provider: ITRE
Target Audience: Employees who serve as flagger training instructors  Prerequisites: SAF 238S
Length of Course: 3 hours  Cost: None
Examination: Yes  Certification: None
PDH: None

SAF 500S  BASIC WORK ZONE SAFETY
Description: This course covers the basics of work zone safety and traffic control operations, focusing on short-term, daytime operations.

Type: Classroom training  Provider: ITRE
Target Audience: Field supervisors  Prerequisites: None
Length of Course: 6 hours  Cost: None
Examination: None  Certification: None
PDH: None

SAF 505S  INTERMEDIATE WORK ZONE SAFETY
Description: This course covers intermediate work zone safety and traffic control operations focusing on plan reading, night work and inspections.
| Type               | Classroom training                      | Target Audience    | Field supervisors | Length of Course | 6 hours | Examination | Yes | PDH   | None | Provider | ITRE | Prerequisites | SAF 500S | Cost    | None | Certification | None |

Maintenance Self-Study Section

The NCDOT Training & Development Section oversees the Self-Study Program. Contained within this section are Maintenance self-study courses for use by NCDOT employees.

To request Maintenance Self-Study courses, employees should make a request through the Training Coordinator for a Self-Study Course enrollment form. Fill out the form and then send it to JoAnn Shepherd, State Road Maintenance Unit, MSC-1567.

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
MAINTENANCE SELF STUDY COURSES

SSC 010T  BASIC MATH REVIEW
Description: A review of math skills that may be job-related in many instances. Acquired skills will also be useful in daily living.

Type: Self study  Provider: State Road Maintenance
Target Audience: Division of  Prerequisites: None
Highways employees  Cost: None
Length of Course: 9 months to  Certification: None
complete
Examination: Yes
PDH: None

SSC 012T  ADVANCED MATH REVIEW
Description: A review of basic algebra, roots, and plane geometry. It is structured to prepare employees for the Construction Mathematics course.

Type: Self study  Provider: State Road Maintenance
Target Audience: Division of  Prerequisites: None
Highways employees  Cost: None
Length of Course: 9 months to  Certification: None
complete
Examination: Yes
PDH: None

SSC 090T  MAINTENANCE OPERATIONS: STREET AND DRIVEWAY ACCESS
Description: This course is a six-week self-study course for maintenance technician trainees designed to teach them about the Street and Access Program. This course is important because the Department has a responsibility to the general public to maintain free and safe access on and off all state-maintained highways. This course teaches the participant to: 1) explain the Department's Street and Highway Access Program, 2) locate specific General Statutes, policies and specifications, 3) identify persons in charge of inspection and making modification changes, 4) fill out permits correctly, and 5) review street and highway access for proper function, drainage, and safety.
SSC 100T  MAINTENANCE OPERATIONS: SUBDIVISION ROADS
Description: This course is a twelve-week self-study course for maintenance technician trainees. It is designed to teach employees about NCDOH standards and requirements for subdivision roads. Upon completion of this course, the participant will: 1) understand the application process for subdivision roads to be added to the North Carolina State Highway System, 2) have a knowledge of the minimum construction standards as required by the North Carolina Division of Highways, 3) be able to review applications and plans for subdivision roads and determine if they meet NCDOH standards, and 4) be able to work with a developer/owner in the application and construction process of subdivision roads leading to the addition of those roads to the state highway system.

SSC 100T  MAINTENANCE OPERATIONS: SUBDIVISION ROADS
Description: This course is a twelve-week self-study course for maintenance technician trainees. It is designed to teach employees about NCDOH standards and requirements for subdivision roads. Upon completion of this course, the participant will: 1) understand the application process for subdivision roads to be added to the North Carolina State Highway System, 2) have a knowledge of the minimum construction standards as required by the North Carolina Division of Highways, 3) be able to review applications and plans for subdivision roads and determine if they meet NCDOH standards, and 4) be able to work with a developer/owner in the application and construction process of subdivision roads leading to the addition of those roads to the state highway system.
SSC 120T  PURCHASE ORDER CONTRACT

Description: This course is a six-week self-study course for maintenance technician trainees. It is designed to familiarize employees with the use and administration of purchase order contracts in maintenance operations. Upon completion of this course, the participant will understand the purpose of a purchase order contract and the requirements for administering such a contract.

Provider: State Road Maintenance
Prerequisites: None
Cost: None
Certification: None

Type: Self study
Target Audience: Maintenance technician trainees
Length of Course: 6 weeks to complete
Examination: Yes
PDH: None
Traffic Services Section

The State Road Maintenance Unit of NCDOT coordinates the use of TSU procedural manuals with Traffic Services. Contained within this section are classroom courses, self-study courses and general skill set manuals for use by NCDOT employees.

Should you have a question or concern about a course or manual within this section, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
TRAFFIC SERVICES

TSU 100T  PRINCIPLES OF PAVEMENT MARKINGS: GENERAL PRINCIPLES
Description: This self-study unit provides information on the general principles for pavement markings. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to pavement markings and markers. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers & technicians  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None

TSU 101T  PRINCIPLES OF PAVEMENT MARKINGS: APPLICATIONS OF PAVEMENT AND CURB MARKINGS
Description: This self-study unit provides information on the applications of pavement and curb markings. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to pavement markings and markers. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers & technicians  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None

TSU 102T  PRINCIPLES OF PAVEMNET MARKINGS: ADVANCED PAVEMENT & CURB MARKINGS
Description: This self-study unit provides information on advanced applications of pavement and curb markings. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to pavement markings and markers.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers & technicians  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None

Target Audience: Engineers & technicians
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services Unit
Prerequisites: None
Cost: None
Certification: None

TSU 132T  PRINCIPLES OF SIGNING: WARNING SIGNS

Description: This self-study unit provides information on warning signs. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Engineers & technicians
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services Unit
Prerequisites: None
Cost: None
Certification: None
**Type:** Self-study/OJT  
**Target Audience:** Engineers & technicians  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** Traffic Services Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

**TSU 133T  PRINCIPLES OF SIGNING: GUIDE SIGNS**

**Description:** This self-study unit provides information on guide signs. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Engineers & technicians  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** Traffic Services Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

**TSU 134T  PRINCIPLES OF SIGNING: OBJECT MARKINGS AND DELINEATION**

**Description:** This self-study unit provides information on object markings and delineation. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Engineers & technicians  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** Traffic Services Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None
TSU 135T PRINCIPLES OF SIGNING: CONSTRUCTION & MAINTENANCE OPERATIONS

Description: This self-study unit provides information on construction and maintenance operations. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Engineers & technicians
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services Unit
Prerequisites: None
Cost: None
Certification: None

TSU 136T PRINCIPLES OF SIGNING: SIGN STORAGE AND HANDLING

Description: This self-study unit provides information on sign storage and handling. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Engineers & technicians
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services Unit
Prerequisites: None
Cost: None
Certification: None

TSU 137T PRINCIPLES OF SIGNING UNIT: SIGN FABRICATION

Description: This self-study unit provides information on sign fabrication. It can be used as a self-study unit for the Traffic Services Transportation Worker. It will help make the trainee familiar with the various manuals, policies and guidelines relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.
Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers &  Prerequisites: None
technicians  Cost: None
Length of Course: At own pace  Certification: None
Examination: Yes
PDH: None

TSU 138T  PRINCIPLES OF SIGNING: SIGN DESIGN
Description: This self-study unit provides information on sign design. It can be
used as a self-study unit for the Traffic Services Transportation Worker. It will help
make the trainee familiar with the various manuals, policies and guidelines relating
to highway signing. There should be an OJT instructor assigned who has experience
with the subject matter included in the course, and who can provide answer to
question the trainee might have.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers &  Prerequisites: None
technicians  Cost: None
Length of Course: At own pace  Certification: None
Examination: Yes
PDH: None

TSU 139T  PRINCIPLES OF SIGNING: TYPE A & B SIGNS
Description: This self-study unit provides information on type A & B signs. It can be
used as a self-study unit for the Traffic Services Transportation Worker. It will help
make the trainee familiar with the various manuals, policies and guidelines relating
to highway signing. There should be an OJT instructor assigned who has experience
with the subject matter included in the course, and who can provide answer to
question the trainee might have.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Engineers &  Prerequisites: None
technicians  Cost: None
Length of Course: At own pace  Certification: None
Examination: Yes
PDH: None

TSU 140T  PRINCIPLES OF SIGNING: SIGN CONDITION AND EVALUATION
Description: This self-study unit provides information on sign condition and
retro-reflectivity to highway signing. It can be used as a self-study unit for the Traffic
Services Transportation Worker. It will help make the trainee familiar with the
various manuals, policies and guideline relating to highway signing. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Engineers & technicians  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** Traffic Services Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

---

**TSU 141T PRINCIPLES OF SIGNING UNIT 12 - ADVANCED SIGN DESIGN**

**Description:** This self-study unit provides information on advance sign design involving the use of computerized hardware and software. It can be used as a self-study unit for the Traffic Services Transportation Worker. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

**Type:** Self-study/OJT  
**Target Audience:** Engineers & technicians  
**Length of Course:** At own pace  
**Examination:** Yes  
**PDH:** None  

**Provider:** Traffic Services Unit  
**Prerequisites:** None  
**Cost:** None  
**Certification:** None

---

**TSU 515T INTERMEDIATE INCIDENT RESPONDER AND ASSESSMENT COURSE**

**Description:** This self-study course will provide the IMAP responder with an intermediate level of knowledge necessary to safely respond to and assess freeway incidents so the roadway can be reopened. For use by intermediate level IMAP Responders to acquaint them with the more involved aspects of freeway incident operations.

**Type:**  
**Target Audience:**  
**Length of Course:**  
**Examination:**  
**PDH:** None  

**Provider:**  
**Prerequisites:**  
**Cost:**  
**Certification:**
TSU 525T  IMAP BASIC INCIDENT RESPONSE
Description: This self-study course will provide the IMAP responder with a basic level of knowledge necessary to safely respond to freeway incidents. For use by entry level IMAP Responders to acquaint them with the basics of freeway incident operations. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Entry level IMAP responders
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services Unit
Prerequisites: None
Cost: None
Certification: None

TSU 535T  ADVANCED INCIDENT RESPONSE EVALUATION AND CLEARANCE
Description: This self-study course will provide the IMAP responder with the advanced level of knowledge necessary to respond to, evaluate, and clear freeway incidents most effectively. For use by journey level IMAP Responders to acquaint them with the most complex aspects of freeway incident operations. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT
Target Audience: Journey level IMAP responders
Length of Course: At own pace
Examination: Yes
PDH: None

Provider: Traffic Services
Prerequisites: TSU 515T, TSU 525T
Cost: None
Certification: None

TSU 540T  INCIDENT MANAGEMENT ASSISTANCE PATROL PROCEDURE
Description: This self-study course will provide the trainee with the procedures to follow when performing routine tasks required of the IMAP Responder. For use by entry level IMAP Responders to acquaint them with the procedures they are to follow while performing the routine of their position. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.
TSU 545T  EMERGENCY TRAFFIC CONTROL

Description: This self-study course will provide the trainee with information needed to set-up basic emergency traffic control at various types of freeway incidents. For use by entry level IMAP Responders to acquaint them with the basic of work zone traffic control and the procedures they are to follow when establishing emergency traffic control at freeway incidents. There should be an OJT instructor assigned who has experience with the subject matter included in the course, and who can provide answer to question the trainee might have.

Type: Self-study/OJT  Provider: Traffic Services Unit
Target Audience: Entry level IMAP responders  Prerequisites: None
Length of Course: At own pace  Cost: None
Examination: Yes  Certification: None
PDH: None
Transportation Engineers Academy

The State Road Maintenance Unit of NCDOT oversees the Transportation Engineers Academy. Contained within this section are the classroom courses for use by NCDOT Transportation Engineers.

To request a training slot for this Academy, make the request through your immediate supervisor.

Should you have a question or concern about these courses, please contact Kevin Brantley at (919) 733-3725 or email: wkbrantley@ncdot.gov.
## TRANSPORTATION ENGINEERS ACADEMY

### TSA 500L  FUNDAMENTALS OF SUPERVISION

**Description:** The goal of this program is to have participants establish a personal foundation for continued growth based on the knowledge and skills needed by a successful NCDOT Transportation Engineer. The Transportation Engineers Academy is a formal training program available exclusively to Transportation engineers. The program draws upon supervisory experience that will allow the participants to share ideas and techniques they use in various types of situations. The attendees will also be challenged to develop new and innovative ways of confronting different issues. The training is designed to be highly interactive and hands-on. The Fundamentals of Supervision is the first level of training for the Transportation Engineers Academy. The most fundamental competency that is required of any engineer is the ability to communicate and work with people. The emphasis of training in this level addresses these issues.

### TSA 510L  ADVANCED SUPERVISORY TECHNIQUES

**Description:** As an engineer advances in level, roles and responsibilities change. The AST presents the participants with challenges to help them develop techniques for handling their changing roles and responsibilities. In addition, technical modules are introduced to include contract administration, planned maintenance, emergency response, and OJT administration. The Advanced Supervisory Techniques is the second level of training for the Transportation Engineers Academy. This level of training concentrates on developing competencies in personnel skills and technical matters including contract administration, planned maintenance, and emergency management.
