PART 1

Background / Eligible Applicants

1.3 Program Overview / Funding Formula

As described in Parts 1.1 and 1.2 of this guidance, IMD provides access for public transportation systems and partners to receive public transportation funding from both the state and federal government. As an administrator of state and federal public transportation funds, NCDOT administers the application process, application review, contracting, compliance, and claims processes associated with each state or federal public transportation funding source listed below.

Refer to Part 1.2 for your particular eligibility for the public transportation funding programs listed below.

Click the buttons below to access information about particular public transportation funding sources administered by NCDOT.

5303 Program Overview

1.3.1 Purpose of Funding Source

The Section 5303 program provides funding for multi-modal transportation planning in metropolitan areas and states. Planning needs to be cooperative, continuous, and comprehensive resulting in long-range plans and short-range programs reflecting transportation investment priorities.

1.3.2 Notes on Eligible Projects

IMD will provide one half the local match (10%) for FTA Section 5303 funded transit planning tasks if State funds are available. No state match will be provided for Section 5303 funds used for highway planning.

If the Section 5303 allocation for your urbanized area does not provide adequate funding to address the area's transit planning tasks, please indicate the additional source of funds in your Unified Planning Work Program (UPWP), such as Section 5307 Planning, Section 104(f) (PL), or local funds.

Note all of the Section 5303 and 5307 funds to be used for planning tasks must be shown in the UPWP.

1.3.3 Priority of Grant Award

Each urbanized area receives a Section 5303 allocation from NCDOT for MPO transit planning activities. The allocations are provided in the [5303 Allocation Table](#).

Capital Purchase of Service Program Overview

1.3.1 Purpose of Funding Source

The goal of the Section 5310 program is to improve mobility for seniors and individuals with disabilities by removing barriers to transportation services and expanding the transportation mobility options available. Toward this goal, FTA provides financial assistance for transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas. A senior is an individual who is 65 years of age or older and the term 'disability' is defined in section 3(1) of the Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. 12102). NCDOT provides access to Section 5310 funding for capital purchase of service expenditures through this application.

1.3.2 Notes on Eligible Projects

Eligible projects include the purchase of public transportation trips/fares towards meeting the goals of the Section 5310 Program.

- ▶ Public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities;
- ▶ Public transportation projects that exceed the requirements of the ADA of 1990 (42 U.S.C. 12101 et seq.);
- ▶ Public transportation projects that improve access to fixed route service and decrease reliance on complementary paratransit; and
- ▶ Alternatives to public transportation projects that assist seniors and individuals with disabilities with transportation.

The applicant must be the one administering the project, determining eligibility, arranging transit services, and/or operating the funded service. Passing through grant funding to another entity will not be allowed.

1.3.3 Priority of Grant Award

In determining a fair and equitable process for project selection, IMD considers the needs of projects that are currently in operation and the need to allow for the implementation of new projects. To that end, IMD has created a systematic set of scoring criteria that will be used to determine an overall point value per project score submitted by transit subrecipients across the state. This comprehensive scoring selection process has been created in conjunction with the overall program goals and to advance transportation services for elderly and disabled individuals in North Carolina. This scoring and evaluation framework for Section 5310 projects will result in an overall composite score that is used to make funding determinations per project.

5310 Operating Program Overview (1/2)

1.3.1 Purpose of Funding Source

The goal of the Section 5310 program is to improve mobility for seniors and individuals with disabilities by removing barriers to transportation services and expanding the transportation mobility options available. Toward this goal, FTA provides financial assistance for transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas. A senior is an individual who is 65 years of age or older and the term 'disability' is defined in section 3(1) of the Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. 12102). NCDOT provides access to Section 5310 funding for rural and small urban transit systems for operating expenditures through this application.

1.3.2 Notes on Eligible Projects

The Section 5310 "Other Section 5310 Projects" provides grant funds for capital and operating expenses to recipients for:

- ▶ Public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities;
- ▶ Public transportation projects that exceed the requirements of the ADA of 1990 (42 U.S.C. 12101 et seq.);
- ▶ Public transportation projects that improve access to fixed route service and decrease reliance on complementary paratransit; and
- ▶ Alternatives to public transportation projects that assist seniors and individuals with disabilities with transportation.

Only applications from Community Transportation systems proposing projects benefiting seniors and individuals with disabilities living in rural areas and/or small urban areas, or non-transit systems such as an RPO applying for volunteer reimbursement projects will be reviewed for funding with this application. If you are interested in 5310 funding for services in a large urbanized area, you must contact your MPO to find out how their FTA-appropriated large urban 5310 funds are awarded.

The applicant must be the one administering the project, determining eligibility, arranging transit services, and/or operating the funded service. Passing through grant funding to another entity will not be allowed.

5310 Operating Program Overview (2/2)

1.3.3 Priority of Grant Award

In determining a fair and equitable process for project selection, IMD considers the needs of projects that are currently in operation and the need to allow for the implementation of new projects. To that end, IMD has created a systematic set of scoring criteria that will be used to determine an overall point value per project score submitted by transit subrecipients across the state. This comprehensive scoring selection process has been created in conjunction with the overall program goals and to advance transportation services for elderly and disabled individuals in North Carolina. This scoring and evaluation framework for Section 5310 projects will result in an overall composite score that is used to make funding determinations per project.

If operating projects are approved, they will be approved on a cost-per-trip reimbursement basis (50/50 cost sharing ratio – no state match will be provided for operating projects).

5311 Non-Urbanized Area Formula Program Overview

1.3.1 Purpose of Funding Source

Section 5311 funding is a federal formula grant for rural areas established to provide assistance to support public transportation in areas with populations of less than 50,000. This funding is provided to address the needs of rural area residents who often rely on public transit to reach their destinations.

1.3.2 Notes on Eligible Projects

Eligible transportation systems (see Part 1.2) can use Section 5311 funds for public transportation projects in non-urbanized areas. Because most rural trips end in urbanized areas, Section 5311 funds can be used for portions of trips in urbanized areas; however, the primary beneficiary of Section 5311-funded transportation activity must be rural areas. A rural transit provider should consider designing its Section 5311-funded services to maximize use by members of the general public who are transportation disadvantaged such as elderly people and people with disabilities.

1.3.3 Priority of Grant Award

North Carolina's coordinated approach to service delivery currently allows for the award of a single application (as a sub-recipient of NCDOT) within each designated service area as identified in the transit system's Transportation Development Plan (TDP) currently on-file with NCDOT. Section 5311 funding is only provided to a single sub-recipient within each geographical area (county or counties served by a regional transit system) as identified in that transit system's TDP. IMD will implement the adoption of a Governing Board resolution that designates the single designated 5311 applicant on a 5-year cycle. NCDOT's cycle is 2018, 2023, 2028 and so forth.

For the FY26 Call for Projects, the 5-year funding allocation formula developed for FY 2023 will continue to be used. The funding formula for FY26 provides 1) a base level of \$30,000 for each county in the 5311-funded transit system's service area, 2) a performance bonus carved from a 10% performance set-aside from the overall formula, and 3) a final apportionment based on the amount of funds that were generated by each transit system. The remaining funds are distributed based on the FTA apportionment formula which is how FTA determines the apportionment to each state. If the formula amount apportioned to a transit system was below FY 2023 totals, state or other federal funds were added to equal no more than a 10% reduction. This 10% reduction will continue each year until the funding matches the earned amounts. Ten percent (10%) of the funding will be based on performance as well. If you were above the apportioned amount, you will receive a slight increase. This funding formula allows for the future incorporation of performance criteria.

Urban Advanced Technology Program Overview

1.3.1 Purpose of Funding Source

Urban Advanced Technology funding is used to benefit transit systems in North Carolina utilizing a wide selection of technologies available today, enhancing the passenger experience enabling transit systems to improve safety and efficiencies in their operations. IMD encourages North Carolina's transit systems to employ advanced technologies fostering increased efficiencies throughout the state.

1.3.2 Notes on Eligible Projects

IMD administers the Urban Advanced Technology grant available to the urban and regional transit systems of North Carolina on a competitive basis. Urban Advanced Technology grants provide funding for technology projects meeting the following criteria:

- ▶ The project must be included in the Regional Intelligent Transportation System (ITS) Strategic Deployment Plans
- ▶ Depicts an understanding and implementation of the NCDOT/ITRE Definitions for Implementing Technologies
- ▶ Adheres to the Advanced Technology Policy
- ▶ Submits a Memorandum of Understanding for execution with IMD related to initial implementation and on-going maintenance of technologies purchased with funding from this program.
- ▶ Adopts a resolution authorizing the transit system to enter into an agreement with NCDOT and verified in the local share certificate

Projects may request up to 90% state match with a 10% local share.

1.3.3 Priority of Grant Award

Funding is awarded to projects that can be completed within the period of performance and are ready to move forward as soon as the project period of performance begins. Proof of these activities must be submitted prior to the project being released. If this requirement cannot be met, the application should be postponed to future years. If you have active projects and are unable to complete another project on time or have not started your current project(s), please wait on another application cycle to apply.

Applications are evaluated based on:

- ▶ Addressing NCDOT mission, goals, values, and meeting focus areas of application
- ▶ Application quality, project goals, and measurements of success
- ▶ Past successes in project management and completions
- ▶ Successful past project management experience

Urban STI Program Overview

1.3.1 Purpose of Funding Source

Systems awarded a grant through NCDOT's Prioritization Process must complete an application in the fiscal year they are using the funds to receive the state match of Highway Trust Funds. The Urban-STI application is used by direct recipients of federal funds from the FTA to apply for and receive reimbursement of the State portion of STI.

1.3.2 Notes on Eligible Projects

Transit systems have the opportunity to apply for an expansion vehicle using the Urban STI Capital application after successfully working with the local RPO, MPO, or NCDOT Division Engineer to submit for and win award of funding through NCDOT's Prioritization Process. The entire project must be submitted for funding consideration through this program (partial phases cannot be submitted for funding e.g., engineering and design). However, a segment including all phases (ROW, Utilities, Design, and Construction) for a fixed guideway project can be submitted. Only projects with a total cost of \$40,000 or greater are eligible.

Note that technology projects are not eligible to be submitted as an STI project. This includes projects such as transit signal prioritization and cameras.

Rural STI Program Overview

1.3.1 Purpose of Funding Source

Systems awarded a grant through STI in NCDOT's Prioritization Process must complete an application in the fiscal year they are using the funds to receive the state match of Highway Trust Funds. The Rural-STI application allows systems to add federal funds where IMD has oversight of the application for the project and receives reimbursement.

1.3.2 Notes on Eligible Projects

Transit systems have the opportunity to apply for an expansion vehicle using the Rural STI Capital application after successfully working with the local RPO, MPO, or NCDOT Division Engineer to submit for and win award of funding through NCDOT's Prioritization Process. The entire project must be submitted for funding consideration through this program (partial phases cannot be submitted for funding e.g., engineering and design). However, a segment including all phases (ROW, Utilities, Design, and Construction) for a fixed guideway project can be submitted. Only projects with a total cost of \$40,000 or greater are eligible.

Note that technology projects are not eligible to be submitted as an STI project. This includes projects such as transit signal prioritization and cameras.

Combined Capital Overview

1.3.1 Purpose of Funding Source

The Combined Capital program allows identified rural and small urban systems the opportunity to apply for funding for capital projects in a single application. This provides IMD the flexibility to fund the approved projects with the type of federal funding programs that best suit the desired projects while managing the funds in the most efficient and effective manner. The Combined Capital application utilizes funds from the 5311, 5307, and 5339 federal programs.

1.3.2 Notes on Eligible Projects

Section 5311 grantees and/or small urban Section 5307 grantees are allowed to request vehicles based on the replacement schedule provided by their assigned Regional Grant Specialist (RGS).

Replacement vehicles must meet the minimum useful life mileage outlined in Capital Replacement Schedule. Click the box to the right to access the Capital Replacement Schedule. Vehicles must meet useful life by June 30, 2024 to be replaced in FY26. Vehicles applied for that do not meet the required mileage criteria will be withdrawn from the list and from the system's individual application. Vehicles will not be replaced due to the age of the vehicle. Note in particular that assets that have met useful life will not automatically be replaced.

Systems can apply for EV's but are only eligible if they have initiated a feasibility study and EV infrastructure design OR already have charging infrastructure in place. Funding for the feasibility study may or may not be included in the grant award. Charging infrastructure must be used for transit vehicles only.

Applicants should consult the FY26 Technology Specification (Click the box to the right) before requesting any replacements of Other Capital Technology or Advanced Baseline Technology.

Transit systems should not use this application for expansion vehicle needs. Transit systems have the opportunity to apply for an expansion vehicle using either the Non-STI Rural Expansion Vehicle application or the Rural STI Capital application. Note that the Rural STI application is applicable only where an applicant has successfully worked with their local RPO, MPO, or NCDOT Division Engineer to submit for and win award of funding through NCDOT's Prioritization Process.

This application excludes Direct Purchase of Service requests, which should be included in the Capital Purchase of Service application.

1.3.2 Priority of Grant Award

Please note that this is a competitive program and, while every effort will be made to fund eligible capital needs identified through the application process, overall program funding is limited and award of all funding requests is not guaranteed.

ConCPT CN Program Overview (1/2)

1.3.1 Purpose of Funding Source

The purpose of the consolidation portion (CN) of the ConCPT funding is to reduce the number of NCDOT IMD grantees while expanding the level of services offered in our communities. Funding will be provided for full-consolidations where two or more public transportation grantees merge into a single grantee.

1.3.2 Notes on Eligible Projects

ConCPT funds must be directly applied to public transportation projects and cannot be used to offset local funding. Consolidation funds may only be used for operating expenses. The lead agency will be the applicant/recipient of the funds.

ConCPT funding is limited to a maximum of \$200,000 per year for each grantee involved in the consolidation project. However, the actual funding levels will be based on the local funds used to pay for expenses according to the most recent NC Operating Statistics (OpStats) for the individual public transportation systems involved in the project. For FY26 applications, Fiscal Year 2022 Operating Statics will be used. The figures in Table 1 show the maximum funding level and are based on each individual system's OpStats data, not the combined total after consolidation. Thus, the maximum available funding is the sum of the figures for each system involved in the consolidation. For example, two-system consolidation where one system has greater than \$800,000 in local funding and the other has system has \$250,000 in funding will receive a maximum of \$325,000. Funds may be reduced depending on the number and quality of applications received.

Table 1. Maximum Funding Per Consolidating System

Local Funding (OpStats)	ConCPT Funding (Maximum)
>\$800,000	\$200,000
\$601,000-\$800,000	\$175,000
\$400,001-\$600,000	\$150,000
\$200,000-\$400,000	\$125,000
<\$200,000	1/2 of Local Funding

Continues on next page

ConCPT CN Program Overview (2/2)

1.3.3 Priority of Grant Award

Consolidation plans will be evaluated according to their potential for reducing the number of NCDOT IMD grantees while improving the quality of services in the local areas.

Because it is unlikely applications received will perfectly align to the targeted expenditure level (based on quality and quantity of applications), NCDOT reserves the right to adjust the funding levels below the maximum to enable all funds to be expended on projects meeting the goals of the ConCPT program.

ConCPT CO Program Overview

1.3.1 Purpose of Funding Source

The purpose of the coordination portion (CO) of the ConCPT funding is to enhance coordination between NCDOT IMD grantees. Funding will be provided for coordination activities where three or more public transportation grantees agree to establish formal relationships to maximize resources, gain efficiencies, and improve access to public transportation. The primary goal of this ConCPT funding is to establish formal relationships between the transit systems for long-distance routes.

1.3.2 Notes on Eligible Projects

ConCPT funds must be directly applied to public transportation projects and cannot be used to offset local funding. Coordination funds may only be used for operating expenses. The lead agency will be the applicant/recipient of the funds.

The routes should include at least three transit systems and must operate every weekday using a published schedule. The routes should be designed to provide access to major medical destinations and nearby regional and intercity transportation facilities such as multi-modal centers and intercity bus stops. Service to other regional destinations such as community colleges should also be considered.

NCDOT IMD's preferred method of reimbursement is to agree with the lead agency on the cost of service to be provided (miles/hours, hours and a wait time hourly rate) and agree on the base route of the service to be provided, preferably two times per day. Then, with appropriate documentation, NCDOT IMD will pay for ½ of the service provided.

ConCPT funding is limited to a maximum of \$200,000 per year for each grantee involved in the coordination project. However, it is anticipated that most projects will be funded at levels lower than the maximum.

1.3.3 Priority of Grant Award

Criteria for evaluating the plans will be based on the increased mobility and cost savings the proposed service will provide.

Because it is unlikely applications received will perfectly align to the targeted expenditure level (based on quality and quantity of applications), NCDOT reserves the right to adjust the funding levels below the maximum to enable all funds to be expended.

Rural State Operating Funds Program Overview

1.3.1 Purpose of Funding Source

The Rural State Operating (RO) grants are available to Small Fixed Route, Regional, and Rural/Urban Consolidated systems to assist in delivering important transit service beyond that which is supported by federal formula funding programs. The purpose of the RO funding program is to extend general transportation opportunities and increase ridership in our rural areas.

1.3.2 Notes on Eligible Projects

The RO grant is made up of state and local dollars. The state share will be 50% and the local share will also be 50%. Reimbursement will either be by route or trip as selected in the application. The state will pay 50% of the net operating expenses.

1.3.3 Priority of Grant Award

Click the box to the right to see the instructions for identifying your reimbursable operating expenditure amount.

RO grants depend on the state funding availability.
Funding might not be available for a certain fiscal year.

Rural Operating Assistance Program Overview (1/2)

1.3.1 Purpose of Funding Source

NCDOT provides state-funded transportation assistance for rural transit providers through the Rural Operating Assistance Program (ROAP). ROAP has three components outlined below:

Elderly and Disabled Transportation Assistance Program (EDTAP) :

Provides operating assistance for the transportation of the state's elderly and disabled citizens

Employment and Transportation Assistance Program (EMPL) :

- 1) Intended to help DSS clients that transitioned off Work First or Temporary Assistance for Needy Families (TANF) in the previous 12 months; or Workforce Development Program participants; or
- 2) Intended to help the transportation of disadvantaged public; and/or
- 3) Intended to help the general public travel to work, employment training, and/or other employment-related destinations

Rural General Public Program (RGP) :

Intended to provide transportation services for individuals from the county who do NOT have a human service agency or organization that will pay for the transportation service.

- 1) The passenger's origin or destination must be in the rural area.
- 2) RGP trips can be coordinated on vehicles with other human services trips.

1.3.2 Notes on Eligible Projects

A county which uses any ROAP funds for non-public transportation trips will not receive further disbursements of ROAP funding until the amount of ROAP funds misspent has been repaid. ROAP funds spent will be accounted for by program on the monthly ROAP report form through Smartsheet.

The county or eligible authority may choose to maintain control of the ROAP funds and reimburse sub-recipients for trip-based services after they have been provided. Or, the county or eligible authority may disburse the ROAP funds to the sub-recipients prior to trips being provided, assuming the county or authority plans to monitor throughout the period of performance whether the trips and transportation services are being provided to eligible individuals and whether all expenditures are allowable.

Rural Operating Assistance Program Overview (2/2)

1.3.3 Priority of Grant Award

The ROAP funding formulas remain the same as in previous years and are distributed across the following three funding project categories EDTAP, EMPL, and RGP. ROAP is a disbursement program and, as such, differs from other funding programs defined by this Unified Grant Application process.

***Refer to the ROAP guidance available on [Connect NCDOT Website](#) for the FY26 application. The guidance will be posted after the State budget is approved and certified.**

SMAP Program Overview

1.3.1 Purpose of Funding Source

The intention of this State Maintenance Assistance Program (SMAP) is to provide operating assistance to urban, small-urban, and urban regional fixed route and commuter bus systems through a state-funded disbursement that functions with low overhead and paperwork.

1.3.2 Notes on Eligible Projects

Eligible uses of the funds are limited to a system's operating costs. Operating expenses are defined in the FTA Circular 9030.1E for the Section 5307 program. Preventive maintenance and ADA service costs now defined for federal grants as capital eligible expenses are still considered operating expenses for SMAP funds. Note: SMAP funds cannot be used as a local match to other state-funded programs, such as the Urban Technology Program grants or the Transportation Demand Management program. These funds support statewide mobility interests including cross-jurisdictional travel.

1.3.3 Priority of Grant Award

The grant will be disbursed as follows:

- 10% equal share
- 30% local commitment
- 60% performance
 - o 30% trips relative to the statewide average
 - o 30% net cost per trip relative to the statewide average
 - o Total expenses minus fares and other operating revenues divided by total trips
 - o Regional providers handled separately

The connectivity portion of the formula is \$2M and distributed proportionally.

SMAP is a disbursement program and, as such, differs from other funding programs defined by this Unified Grant Application process.

***Refer to the SMAP guidance available on [Connect NCDOT Website](#) for the FY26 application. The guidance will be posted after the State budget is approved and certified.**

Transportation Demand Management Application Overview

1.3.1 Purpose of Funding Source

Transportation Demand Management (TDM) programs promote alternative transportation options to the single occupant vehicle. Included among these alternatives are carpooling, vanpooling, telecommuting, transit, bicycle, flexible work hours, compressed workweeks and parking policies/pricing structures. NCDOT IMD is funding these TDM programs to continue supporting the provisions of the Ambient Air Quality Improvement Act of 1999 (Senate Bill 953), which addressed concerns over ground level ozone pollution from motor vehicles and the need to deal with increasing vehicle miles traveled (VMT) and nitrous oxide (NOx) emissions. The bill established a goal of reducing the growth of commuter VMT in the state by 25 percent from 2000 until 2009, which was achieved. Continuing strides have been made in the years following this achievement.

Urban and rural areas in the state interested in a TDM Program who do not currently receive state TDM funds should contact their regional planner ([Regional Contact Information](#)).

Travelers' Aid Program Overview

1.3.1 Purpose of Funding Source

The mission of the Travelers' Aid program is to advance and support a network of human service providers committed to assisting individuals and families who are in transition or crisis and are disconnected from their support systems. Travelers' Aid programs consist of a diverse group of human service non-profit organizations and a network of transportation providers. While each agency shares the core service of helping stranded travelers, many Travelers' Aid agencies provide shelter for the homeless, transitional housing, job training, counseling, local transportation assistance, and other programs to help people in crisis.

1.3.2 Notes on Eligible Projects

The overall purpose of the Travelers' Aid Program is to provide intercity bus and/or train tickets for disadvantaged individuals, victims of domestic violence, and stranded travelers in need of transportation to other locations in times of distress.

Urban State Match Program Overview

1.3.1 Purpose of Funding Source

NCDOT IMD responds to requests for Urban State Match Funding to be used as a match for both federal (FTA and FHWA) and locally funded urban transit projects. Federal funding sources which can be matched through these requests include 5307 Urbanized Area Formula Grants, 5339 Bus and Bus Facilities, 5337 State of Good Repair Grants, 5310 Elderly and Disabled, and Discretionary grants from the FTA. In addition, locally funded projects are eligible for a state match. Urban State Match funds are available from the upcoming State Fiscal Year 2026 appropriations and must be used in the fiscal year they are received.

1.3.2 Notes on Eligible Projects

Only facility projects included in the STIP in FY 2013 or before and not part of the STI Process are eligible for state match. Facility projects are limited to costs associated with a new building or rehabilitation/renovation of an existing building. They do not include other projects such as park and ride lots, bus shelters, etc. Vehicle replacements prioritized through the STI process are not eligible for state match.

Note that any project where reimbursement requests will not be made during FY26 (July 1, 2025 to June 30, 2026) is not eligible for FY26 state match. Those projects can be submitted for a state match request during a year in which claims will be submitted. Urban State Match money must be spent in the fiscal year it is acquired.

1.3.3 Priority of Grant Award

Projects will be evaluated based on transit system operating performance factors and vehicle fleet characteristics. In addition, whether the transit system has received state match funds over the past two years will be considered. Flexibility is important in the analysis of project submissions due to individual transit system characteristics and funding amounts of individual project submissions in relation to limits on funding totals.

Application should be submitted only when receiving a vehicle during this fiscal year

Non-STI Rural Expansion Vehicle Program Overview

1.3.1 Purpose of Funding Source

This funding opportunity is for rural systems who are interested in applying for an expansion vehicle. State matching funds will not be provided for projects funded through this program.

1.3.2 Notes on Eligible Projects

Eligible projects are expansion vehicles and the security cameras, lettering and logos, and other such additions to the vehicle only. Computers, furniture, and other capital requests are not eligible under this grant.

All projects eligible for STI to be funded with FTA Section 5311 funds or 5307 funds must be submitted and scored under STI.

1.3.3 Priority of Grant Award

The opportunity for funding requests made through this program will only be considered after all Combined Capital funding requests. NCDOT will prioritize the funding of vehicle replacement requests over any requests made through this program. Funding allocations made through this program will be considered on a competitive basis.

Mobility Manager Program Overview

1.3.1 Purpose of Funding Source

The Mobility Manager Program consists of short-range planning and management activities, projects for improving coordination among public transportation and other transportation-service providers carried out by a recipient or sub-recipient through an agreement entered into with a person, including a government entity, under 49 U.S.C. Chapter 53 (other than Section 5309).

1.3.2 Notes on Eligible Projects

General marketing and administrative duties are not eligible activities for the Mobility Manager position. The Mobility Manager Program does not include operating public transportation services. Funds from the Rural Operating Assistance Program cannot be used as a match for a Mobility Manager project.

1.3.3 Priority of Grant Award

NCDOT IMD will consider all the Mobility Manager project applications, but may not fund all of them, if it is determined that funding more than one creates a duplication of effort within the same geographic and/or service area. Funding is not guaranteed for the Mobility Manager Program, and if a project is selected it could be partially funded.

In determining a fair and equitable process for project selection, IMD considers the needs of projects that are currently in operation and the need to allow for the implementation of new projects. To that end, IMD has created a systematic set of scoring criteria that will be used to determine an overall point value per project score submitted by transit subrecipients across the state. This comprehensive scoring selection process has been created in conjunction with the overall program goals and to advance transportation services for elderly and disabled individuals in North Carolina. This scoring and evaluation framework for Section 5310 projects will result in an overall composite score that is used to make funding determinations per project.

Capital Cost of Contracting Program Overview

1.3.1 Purpose of Funding Source

The Integrated Mobility Division (IMD) has created a separate grant for Capital activities related to Capital Cost of Contracting. This grant opportunity is a sub-section of the State's allocation of Section 5311 or 5339 funding and has been developed to promote the development and expansion of microtransit systems across the state.

Capital cost of contracting is used in cases when transit agencies elect to work with a contractor to provide transit operations or maintenance services or vehicles that will be used in public transportation service. The Federal Transit Administration (FTA) will provide funding assistance for the capital used for these types of transit service contracts with a private company. The capital consumed during the contract period typically includes a proportionate share of funding provided by the FTA, the private contractor along with the transit agency. FTA refers to this concept of assisting with the capital used in the contract period as "Capital Cost of Contracting."

Only costs that are attributed to the privately owned assets by contractor are eligible for funding assistance. Capital items, like rolling stock, purchased with federal, state or local funding assistance are not eligible expenses for capital cost of contracting.

1.3.2 Notes on Eligible Projects

Current Section 5311 sub-recipients are eligible to apply for funding for Capital Cost of Contracting, but application restrictions, i.e., complete project, duplicate project, regional participation, may apply. Transit agencies may utilize Capital Cost of Contracting when offering additional types of transit service like microtransit, that have not been traditionally offered in a particular location.

PART 2 Eligible Expenditures

PART 2

Eligible Expenditures

2.1 G Codes & UPTAS Compliance

All community transportation systems are required to utilize the Uniform Public Transportation Accounting System (UPTAS) for budgeting and reporting. NCDOT created and maintains UPTAS to communicate in a standardized language with transportation partners (to include local governments and transit authorities) through a unified set of accounting codes specific to transportation expenditures. UPTAS outlines the codes to be used by applicants so that applicants can communicate with NCDOT accountants for budgeting, accounting, invoicing, and reporting purposes. Please refer to the UPTAS guidance ([link at right](#)) for further details.

In the following Part 2.2, this guidance document will detail which codes, as outlined in UPTAS, are eligible by associated public transportation grant funding source. Part 2.2 details the accounting codes that should be used when creating, submitting, and reporting on your public transportation grant applications. Although not detailed in the linked UPTAS document, Part 2.2 also provides information for programs that utilize M-Codes and other accounting mechanisms where managed by NCDOT.

UPTAS

PART 2

Eligible Expenditures

2.2 Eligible Expenses

While an applicant's governing body will determine the particular items for expenditure for any particular funding source within identified eligibility for each funding source; applicant reporting on expenditures/desired expenditures will need to utilize the correct UPTAS codes associated with those expenditures.

Based on the public transportation grants for which you will apply, click the links in the cells below to identify eligible expenditures listed by the associated UPTAS accounting codes. Note that reference to these applicable codes will be necessary in order to submit an application through the online application submittal process (through Electronic Business System or EBS). Please refer to the UPTAS guidance (link at right) for further details.

Capital Cost of Contracting Eligible Expenses

2.2.1 Capital Cost of Contracting Eligible Expenses

The Capital Cost of Contracting grant is targeted to project-specific activities typically included in common transit service contracts with a private provider. Both FTA and IMD will allow a transit agency to fund a percentage of leased service or contracted maintenance capital costs. The percentages are shown in the table below are based on the type of contract exercised by the transit agency. The allowed percent of funding assistance is based on the traditional 80 percent federal share, typical for most capital purchases. The percentages apply whether the service is local, express, shuttle, paratransit or demand-responsive service.

The eligible activities and the corresponding allowed funding percentages are found in [Appendix F of the FTA Section 5311 circular 9040.1G](#), Formula Grants for Rural Areas and are included in the table below.

State funding is not guaranteed until programmed and is only partially reimbursed depending on the availability. Use this information below to identify your desired Capital Cost of Contracting eligible expenditures by G-Code.

Eligible Sources of Local Match

Instructions

As with all FTA formula program grants administered by NCDOT, the local match must be provided from sources other than United States Department of Transportation funds (USDOT). Examples of possible local match sources include:

- Undistributed cash surplus
- Replacement cash fund or reserve
- Service agreement with a state or local social service agency or a private social service organization
- Amounts appropriated or otherwise made available to a department or agency of the Government (other than the USDOT) that are eligible to be expended for transportation
- Employment training, aging, community services, vocational rehabilitation services
- TANF
- Other non-USDOT federal funds for local match (click [here](#) for more instruction)
- Non-Federal sources that may be used for any or all of the local share include:
 - State or local appropriations
 - Dedicated tax revenues
 - Private donations
 - Net income generated from advertising and concessions

Notes

- Farebox revenue is not an applicable source of local match.
- Applicants are responsible for verifying the eligibility of non-USDOT federal funds the applicant proposes to use as their local match.
- Income from contracts to provide human service transportation may be used either to reduce the net project cost (treated as revenue) or to provide local match for operating assistance. In either case, the cost of providing the contracted service must be included in the total project cost. No FTA program funds can be used as a source of local match for other FTA programs, even when used to contract for service.
- The state-funded Rural Operating Assistance Program (ROAP) funds can also be used as matching funds. These funds are allocated to the county or to a transportation authority. Applicants should inquire with the county manager and/or county finance office about the availability of the ROAP funds.

Other Non-USDOT Federal Funds for Local Match

Instructions

The local match may be derived from federal funding programs other than DOT programs. Federal programs used as match must include funding for transportation. **To use these funds as local match for FTA funds, the cost of the activities funded by the non-DOT federal funds must be integrated into the total net project costs of the FTA grant.** The transportation activities funded by the non-USDOT federal funds must be inside the scope of the project to be used as part of your local match.

Notes

- Applicants are responsible for verifying the eligibility of non-USDOT federal funds the applicant proposes to use as their local match.

Identifying Your Reimbursable Operating Expenditure Amount

Instructions

Applicants must ensure their 5311 operating and 5311 administrative budget requests match the FY26 approved budgets (see Part 3 Application Processes: 5311 Non-Urbanized Area Formula Program, Step 4-3 for more information). Section 5311 reimbursable operating expenses must account for specific restrictions as detailed below. Section 5311 operating funds can ONLY be used to support rural general public routes (RGP).

Only net operating expenses are eligible for reimbursement (click [here](#) to see how to calculate net operating expenses).

Funds received pursuant to a service agreement with a State or local social service agency or a private social service organization may be used as local match. Income from contracts to provide human service transportation may be used either to reduce the net project cost (treated as revenue) or to provide local match for Section 5311 operating assistance. In either case, the cost of providing the contract service is included in the total project cost.

Note that the manner in which a sub-recipient applies income from human service agencies to a project affects the calculation of net operating expenses and, therefore, the amount of Section 5311 operating assistance the project is eligible to receive.

Notes

- RGP Routes - Services intended to provide transportation for individuals from the county who do not have a human service agency or organization that will pay for the transportation service. The passenger's origin or destination must be in the rural area.
- Operating Expenses - Operating expenses are considered those costs directly related to system operations. Eligible items are defined as stated in the UPTAS manual and State Management Plan.

How to Calculate Net Operating Expense

Instructions

Net operating expenses are those expenses remaining after the provider subtracts operating revenues from eligible operating expenses. Operating revenues must include farebox revenues. Farebox revenues include fares paid by riders who are later reimbursed by a human service agency or other user-side subsidy arrangement. Farebox revenues do not include payments made directly to the transit system by human service agencies to purchase service. However, purchase of transit passes or other fare media for clients would be considered farebox revenue. A voluntary or mandatory fee that a college, university, or similar institution imposes on all its students for free or discounted transit service is not farebox revenue. Farebox revenue must be used to reduce total operating expenses (treated as revenue).

Net Operating Expenses = Total Eligible Operating Expenses – Fare Revenues

RO Funding Availability

Instructions

- ▶ NCDOT created a funding formula for equitable distribution of the RO funds to all systems that qualify. The funding formula is 50% based on individuals in poverty and 50% based on service hours.
- ▶ The systems identified below are the only applicants that are eligible for RO funding.
- ▶ The maximum amount of RO funding a system may apply for is listed in the funding table below. Systems may only use budget line item G-313 (Transportation of Clients and Others) and this funding supports 50% of the proposed service.

Requirement for TAB or Governing Board (1/2)

Each applicant is REQUIRED to have a Transportation Advisory Board (TAB) or a Governing Board if an Authority or non-profit organization. A TAB is made up of stakeholders from the service area that care about the services provided by the transit system. The make-up of the TAB is representative of the various target audiences in the service area and includes one or more actual passengers of the transit system. An "ACTIVELY ENGAGED" TAB is expected to discuss unmet needs in the service area, service design and scheduling, billing rates and fares, and to resolve complaints. They also monitor compliance with federal regulations and the status of any deficiencies noted in any official federal, state, or local review or report. The TAB is a locally formed advisory group based on the following guidelines and requirements:

TAB Composition

CATEGORIES	PUBLIC HUMAN SERVICE AGENCY	TRANSPORTATION PROVIDERS	PUBLIC AND BUSINESS SECTORS	GOVERNMENT AND GOVERNMENTAL AFFILIATES	TRANSIT USER
Suggested number of representatives per category	3-5	1-2	4-5	3-5	1-3
NOTE: TAB members should be individuals that know about the transit needs of the general public including the elderly, minorities, people with disabilities, Limited English Proficiency (LEP), or low income populations living in the service area.	<ul style="list-style-type: none"> ▪ Senior Services ▪ DSS ▪ Vocational Rehabilitation ▪ Head Start ▪ Shelter Workshop ▪ Health Dept. ▪ Veterans Admin ▪ Smart Start ▪ Mental Health ▪ Housing Authority ▪ Human Service Transit Users 	<ul style="list-style-type: none"> ▪ Private transportation providers ▪ Intercity bus providers ▪ Ambulance Service ▪ Regional Authority ▪ Urban System ▪ Faith based services ▪ Volunteers 	<ul style="list-style-type: none"> ▪ Chamber of Commerce ▪ Major employers ▪ DBE's ▪ Hospital/Dialysis Ctr. Requirement for TAB or Governing Board (2/2)

*Representatives from Emergency Management and the local Rural Planning Organization or Metropolitan Planning Organization are encouraged to attend at least 1 TAB meeting per year if possible to understand the priorities of the transit system; offer advice on what they can do for, or need from, public transportation; and to build strong working relationships.

- The TAB must include representatives from the elderly, minority, Limited English Proficiency (LEP), disabled and/or low-income populations in the service area or include individuals that represent these consumer groups that will challenge the transit system to be more sensitive to their needs or to discuss unmet needs of their consumer group. Census data should be consulted to determine which groups should be represented and the size of the representation needed.
 - If the applicant serves as an “umbrella” agency for programs in addition to transportation services, then the Executive or Governing Board may not serve as the TAB. There may be overlapping of members from the Executive or Governing Board, but there must be a separate TAB that meets the requirements.
 - If the applicant is a transportation authority or a non-profit organization that only provides transportation, the Executive or Governing Board may serve as the TAB. In this case, the composition of the Executive or Governing Board will have to meet the 5311 Program requirements to serve as the TAB or consider creating a separate TAB that does meet the requirements.
 - IMD expects, at a minimum, a quarterly TAB meeting for the community transportation system to maintain ongoing communications as one means of seeking public involvement, and ongoing administrative oversight. TAB meetings must be open to the public and the public must be notified of the scheduled meetings through such means as posting notices on agency websites; local news media; flyers; etc. Additionally, meeting minutes must be published and distributed to IMD Regional Grant Specialists, with original file copies maintained by the transportation system for a minimum of five (5) years.
 - All TAB or Governing Board members must sign an annual Conflict of Interest form and the signed form must be attached as an application document (see Step 2 and Step 3 in Part 3).

Federal Motor Carrier Safety Administration (FMCSA) Rule

Grantees that receive only Section 5310 assistance are not subject to FTA's Drug and Alcohol testing rules, but must comply with the Federal Motor Carrier Safety Administration (FMCSA) rule for employees who hold Commercial Driver's Licenses (49 CFR part 382). Section 5311 grantees that also receive funding under one of the covered FTA programs should include any employees funded under Section 5310 projects in their testing program. An FTA compliant testing program, as required by the receipt of FTA operating or capital funding (5307, 5309, 5311), can be used for Section 5310 employees; there is no need to have two testing programs. Employees of a grantee of Section 5310 funds from a designated recipient of another FTA program (such as 5307 or 5311) should also be included in the designated recipient's testing program.

Sub-recipient Request

Urban State Match requests submitted for projects being funded through 5339 funds at the request of an Urban System's sub-recipient must include documentation of the official sub-recipient request as an attachment submitted as part of the application phase (see Step 6).

Public Hearing Outreach

Instructions

Outreach efforts beyond holding a public hearing must be conducted to inform the public including minorities, women, elderly, disabled, Limited English Proficiency (LEP), low income individuals, and persons who are not human service agency clients, about the availability of public transportation funds and to discuss transportation service needs. These efforts should include, but are not limited to surveys, presentations to groups, committees, fliers and/or posters. The intent is to remove barriers and conditions that prevent these groups from receiving access, participation and benefits of the funded services.

Services and benefits must be distributed in a non-discriminatory manner. Title VI of the Civil Rights Act of 1964 applies. This form should include a detailed description of public hearing outreach efforts by the applicant to inform the public (including minority, women, elderly, disabled, limited English proficiency (LEP) and low income individuals) about the public hearing to comment on the application.

Notes

- Refer to Step 4 through Step 7 in Part 3 for instructions for document submission.

Copy of Locally Coordinated Human Service Plan

To be eligible for Section 5310 funding, the FAST Act requires projects and services funded through Section 5310 be derived from or included in a locally developed, Coordinated Public Transit – Human Service Transportation Plan; and that the plan was developed and approved through a process that includes the participation of seniors and individuals with disabilities, public and private transportation providers, community agencies, and others stakeholders. FTA maintains flexibility in how projects appear in the coordination plan. The applicant’s proposed project may be identified as filling a transportation need, or as strategies and activities addressing an identified service gap or transportation coordination objective articulated and prioritized within the plan. This plan cannot be more than four (4) years old in air quality non-attainment and maintenance areas and five (5) years in air quality attainment areas.

The locally developed, Coordinated Public Transit – Human Service Transportation Plan includes 1) an assessment of available services that identifies current transportation providers, 2) an assessment of transportation needs for individuals with disabilities and seniors, 3) strategies, activities, and/or projects to address the identified gaps between current services and needs, as well as opportunities to improve efficiencies in service delivery, and 4) priorities for implementation based on resources, time, and feasibility.

The applicant will be asked to provide the page number from the locally developed, Coordinated Public Transit - Human Services Transportation Plan that mentions or describes the strategy or action included in the application. The application will not be considered unless a copy of the locally coordinated plan from the applicant’s service area is attached with the application documents.

MPO/RPO Letter of Support

The FTA requires that projects receiving funds under Sections 5310 – Enhanced Mobility of Seniors and Individuals with Disabilities Program address the unmet transportation needs or gaps in service as described in the locally developed, Coordinated Public Transportation - Human Service Plan. If the proposed service is within an urbanized area and funded, the project must be listed in the MTIP. Grantees preparing to operate a 5310-funded service in a small urbanized area should notify the MPO staff immediately that they have applied for funding from these programs. This will allow the MPO staff and committee to begin the process of amending the MTIP and requesting an amendment of the STIP before the project is presented to FTA.

Estimate(s) or Proposal(s)

If the applicant intends to include capital items in the funding request, an Estimate(s) or Proposal(s) must be submitted along with other required documents.
